AIM OF THE WORK	
SUMMARY	I
INTRODUCTION	1
Synthesis of pyrimidine derivatives	1
A) Synthesis of pyrimidine nucleus	1
i) Synthesis of pyrimidine from C-C-C and N-C-N fragments.	2
ii) Synthesis of pyrimidine from C-C-C-N and C-N fragments.	5
iii) Synthesis of pyrimidine from C-C-N and C-N-C fragments.	7
iv) Synthesis of pyrimidine from N-C-C-C-N and C fragments.	8
v) Synthesis of pyrimidine from C-N-C-N and C-C fragments.	9
vi) Synthesis of pyrimidine from C-C-C-N-C and N fragments.	10
vii) Synthesis of pyrimidine from N-C-C-C-N-C fragment.	12
viii) Synthesis of pyrimidine by ring transformation and ring expansion.	13
B) Synthesis of fused pyrimidines	15
1. Synthesis of triazolopyrimidines	15
2. Synthesis of pyridopyrimidines	17
3. Synthesis of pyrazolopyrimidines	19
4. Synthesis of oxazolopyrimidines	21
5. Synthesis of thiazolopyrimidines	23
Reactions of pyrimidines	25
1) Electrophilic substitution	25
2) Nucleophilic substitution	27
3) Alkylation and acylation	28
4) Reaction with active methylene group containing compounds.	29
Biological activity of pyrimidine derivatives	30
RESULTS & DISCUSSION	33
Synthesis of 4-(4-benzoylamino-phenyl)-6-(4-chlorophenyl)-1H-pyrimidine-2-thione	33
Reactions of 4-(4-benzoylamino-phenyl)-6-(4-chlorophenyl)-1H-pyrimidine-2-thione	36
I) Reaction with hydrazine hydrate	36
II) Reaction with anthranilic acid	38
III) Reaction with <i>o</i> -phenylenediamine	38
IV) Reaction with piperidine	39

V) Reaction with acrylonitrile.....	40
VI) Reaction with chloroacetic acid.....	41
VII) Reaction with β -aroylacrylic acid.....	41
VIII) Reaction with ethyl chloroacetate.....	43
Behavior of ethyl (pyrimidin-2-yl)thioacetate derivative towards hydrazine hydrate.....	45
Reactions of 2-[4-(4-benzoylamino-phenyl)-6-(4-chlorophenyl)-pyrimidin-2-yl]thio}acetohydrazide	45
a) Reaction with acetylacetone.....	45
b) Reaction with ethyl acetoacetate.....	46
c) Reaction with <i>p</i> -toluic acid.....	47
Reactions of 4-(4-benzoylamino-phenyl)-6-(4-chlorophenyl)-2-hydrazinopyrimidine	48
1) Reaction with acetylacetone.....	48
2) Reaction with carboxylic acids.....	49
3) Reaction with phthalic anhydride.....	50
4) Reaction with carbon disulphide.....	52
5) Reaction with <i>p</i> -hydroxybenzaldehyde.....	52
Biological activity	54
