

Item	Page
1.1-Definition of Corrosion	1
1.2-Importance of Corrosion Studies	1
1.3-Basic Causes Necessary for Corrosion	1
1.3.1- Condition necessary for corrosion	1
1.3.2- Environmental factors	2
1.3.3-Effect of material selection	2
1.3.4-Water intrusion	2
1.4 –Classification of Corrosion	3
1.5- Electrochemical Theory of Corrosion	3
1.6- Type of Corrosion	5
1.7 –Methods of Corrosion Protection	6
1.7.1-Application of Protective Coatings	6
1.7.2-Polarize or shift the potential of the metal	7
1.7.3 . Cathodic protection	7
1.7.4. Material selection	7
1.8. Corrosion Inhibitors	8
1.9.Corrosion Inhibition	9
1.9 .1. Corrosion inhibition in acid solutions	9
1.9.2. Factor affecting inhibitor action in aggressive acid medium	10
1.9.3- Theories of corrosion inhibition	13
1.9.3.1- Adsorption theory	13
1.9.3.2-Electrosorption	13
1.9.3.3- Ω -Orbital adsorption	14
1.9.3.4 –Vander Waals adsorption	14

Item	Page
1.9.3.5- Film theory	14
1.9.3.6-Adsorption isotherm	14
1.10-Techniques for Studying Corrosion	16
1.10.1-Chemical methods	16
1.10.1.1- Gravimetric	16
1.10.1.2- Gas –volumetric method	17
1.10.1.3- Solution analysis	17
1.10.2- Electrochemical methods	17
1.10.2.1-Tafel extrapolation method	17
1.10.2.2- Electrical resistance method	17
1.10.2.3- Polarization resistance method	18
1.10.2.4- Coulostatic method	18
1.10.2.5- Impedance measurements	19
1.11- Literature Survey on Corrosion of Aluminum and Al/Si alloy and their Inhibition	20
AIM OF THE PRESENT WORK	56
CHARTER(2) Expermental techniques	
2.1- Composition of Material Samples	57
2. 2- Test Specimens and Treatment	57
2. 2.1- For weight -loss measurements	57
2.2.2-For electrochemical measurements (potentiodynamic and ACimpedance methods)	
2.3- Mateials and Solutions	57

Item	Page
2.3.1- Hydrochloric acid	58
2.3.2-Chemical additives	59
2.3.3-Inorganic additives (BDH grade)	60
2.4- Procedures Used for Corrosion Measurements	60
2.4.1- Weight-loss measurements	60
2.4.2-Electrochemical technique (potentiostatic polarization method and AC impedance method	61
2.5- Determination of Inhibition Efficiency	62
2.6 –Calculation of the Degree of Surface Coverage	63
2.6.1-using polarization method	63
2.6.2-Using weight loss method	64
CHAPTER(3)	
RESULTS AND DISCUSSION	
SECTION (A) STUDYING THE CORROSION BEHAVIOR OF ALUMINUM AND ALUMINUM –SILICON BY THE CHEMICAL TECHNIQUE.	
3.1-Corrosion Inhibition Behavior	66
3.2. Role of anions in Corrosion -Inhibition of Aluminum in Acid Solution and their Synergistic Effect	71
3.4-Adsorption Isotherm	89
SECTION (B) STUDYING THE CORROSION BEHAVIOR OF ALUMINUM BY THE ELECTROCHEMICAL TECHNIQUES	92
3.4-Potentiodynamic polarization Method	93

Item	Page
3.4.1- Potentiodynamic polarization	93
3.5- Effect of Temperature and Activation Parameters on the Inhibition Process	105
3.6- Electrochemical Impedance Spectroscopy (EIS)	116
SECTION (C) STUDYING THE CORRELATION BETWEEN INHIBITION ACTION AND CHEMICAL STRUCTURE OF THE INHIBITORS	
3.7-Chemical structure of the inhibitors and its effect on the corrosion inhibition	129
