List of figures	
List of photos	
List of Abbreviations	
Introduction	1
Aim of the work	3
Review of Literature	4
Materials and Methods	34
1- Media	34
2- Media for isolation and cultivation	34
3- Media for identification	36
4- Media for sensitivity tests	40
5- Reagent used for identification process of bacteria	41
6- Methods	44
7- Samples	44
8- Identification of bacterial isolates	46
9- Antibiotic sensitivity test	55
10- Disc diffusion method	55
11- Determination of MICs and MBCs of different antibiotics against selected isolates	57
12- Antimicrobial activities of medicinal plant extracts	59
13- Preparation of medicinal plant extracts	59
14- Antimicrobial activities of combination between medicinal plant extracts and MICs of antibiotics	61
15- Neutralization for <i>Hibiscus sabdariffa</i> extract by 1 ml of NaOH (1 N)	61
16- Protein analysis for tested bacteria	62
17- Separation of effective compounds from <i>Syzygium aromaticum</i> by (TLC)	67
18- Identification of antimicrobial extracted component	68
19- Statistical analysis of the obtained results	68

Results	69
1- Collection of urine samples from males and females	69
2- Community-acquired and hospital-acquired UTIs	77
3- Specific risk factors complicated urinary tract infections	80
4- The pus cells number and total count number of bacteria in males & females in positive urine samples	83
5- Identification of bacterial isolates	88
6- The distribution of pathogenic isolate from positive urine samples	95
7- Susceptibility of different antibiotics drugs against pathogenic isolates	99
8- Sensitivity test of pathogenic isolates against different tested antibiotics drugs	103
9- Statistical analysis of sensitive, intermediate and resistant pathogenic bacterial isolates against different antibiotics	106
10- Minimum inhibitory concentration (MIC) and minimum bactericidal concentration (MBC) of selected antibiotics	110
11- Antagonistic effect of different clinical medicinal plant extracts	118
12- Antagonistic effect of cold water extracts	118
13- Antagonistic effect of boiling water extracts	119
14- Antagonistic effect of alcoholic extracts	120
15- The effect of combination between different medicinal plants extracts and MICs of some antibiotics on clinical bacterial isolates	133
16- The effect of <i>Hibiscus sabdariffa</i> extract after neutralization for its high acidity by 1 ml of NaOH (1 N)	139
17- Protein analysis for clinical bacterial isolates under stress of clove extract and ofloxacin antibiotic	142
18- Purification and identification of the antibacterial extracted compound	145
19- ¹ H NMR spectrum	145
20- IR spectrum	145
Discussion	149
Summary	158
References	161
Arabic summary
