

Contents

Introduction and aim of the work.....	1
Development and embryology.....	4
Anatomy of the chest wall	5
Chest wall deformities.....	24
Congenital disorders of sternum and chest wall.....	25
Pectus excavatum.....	25
Pectus crainatum.....	29
Sternal defects.....	30
Poland's syndrome.....	32
Thoracic Dystrophy.....	35
Management of congenital chest wall deformities.....	36
Pectus excavatum	36
Pectus crainatum.....	67
Poland's syndrome.....	75
Sternal defects.....	84
Acquired chest wall defects	85
Chest wall injuries.....	85
Tumors of the chest wall.....	87
Infections of the chest wall.....	90
Radiation damage of the chest wall.....	93
Reconstruction of acquired chest wall defects.....	94
Preoperative evaluation.....	94
Chest wall resection.....	96
Use of muscle and musculocutaneous flaps in reconstruction.....	103
The use of perforator flaps in reconstruction.....	132
The use of omentum in reconstruction.....	134
The use of prosthetic materials in reconstruction.....	140
The use of extrathoracic skeletal muscles for intrathoracic transposition in reconstruction.....	144
Summary.....	148
References.....	149
