Summary	
---------------	--

Chapter 1:

Introduction and Basic Concepts

1.1 Variational iteration method.....	1
1.2 Adomian decomposition method.....	7
1.2.1 ADM for non-linear ordinary differential equations.....	7
1.2.2 ADM for non-linear partial differential equations.....	9
1.3 Homotopy perturbation method.....	13
1.4 Finite element method.....	20
1.4.1 Basic definitions and concepts.....	20
1.4.2 Numerical example by using finite element method.....	22
1.5 Numerical solution of the nonlinear coupled system in thermo-elasticity equations using FEM.....	26
1.5.1 Model problems using FEM.....	26
1.5.2 Numerical implementation.....	32
1.6 Conclusion.....	36

Chapter 2:

On the Approximate Solutions for Nonlinear Coupled Systems of Partial Differential Equations Using Variational Iteration Method

2.1 Introduction.....	37
2.2 Analysis of the variational iteration method.....	37
2.3 Convergence analysis of VIM.....	39
2.4 Numerical implementation using VIM.....	44
2.4.1 Numerical treatment for coupled system of Burgers' equations.....	44
2.4.2 Numerical treatment for Cauchy problem in nonlinear 1-D thermo-elasticity equations.....	47
2.5 Conclusion and remarks.....	51

Chapter 3:

Nonlinear Coupled Systems of PDEs Using Adomian's Decomposition Method

3.1 Introduction.....	53
3.2 Numerical simulation for population dynamics with density-dependent migrations and the Allee effects.....	53
3.2.1 The model problem.....	53
3.2.2 Implementation of ADM to the model problem.....	55
3.2.3 Comparison with travelling wave solution.....	57
3.3 ADM for non-linear coupled system of thermo-elasticity equations.....	60
3.4 ADM for the coupled Drinfel'd- Sokolov-Wilson wave equations.....	64
3.5 Conclusions.....	66

Chapter 4:

Nonlinear Coupled Systems of PDEs Using Homotopy Perturbation Method

4.1 Introduction.....	68
4.2 HPM for the coupled nonlinear Manakov system.....	68
4.2.1 The conserved quantities in one space variable.....	70
4.3 Implementation of HPM to coupled system of Burgers' equations.....	72
4.4 Implementation of HPM to coupled system of 1D thermoelasticity equations...	75
4.5 Summary and conclusions.....	78
Future Work.....	79
Bibliography	80
Arabic Summary
