

LIST OF CONTENTS

Subject	Page
INTRODUCTION.....	1
RESPIRATION AND RESPIRATORY FAILURE.....	3
Pathophysiological mechanisms of acute respiratory failure.....	3
- Hypoventilation.....	4
- Ventilation-perfusion mismatch.....	5
- Shunt	7
- Abnormal diffusion.....	8
- Low inspired oxygen fraction	8
- Venous admixture.....	8
Pathophysiological types of acute respiratory failure	9
- Type I: acute hypoxemic respiratory failure	10
- Type II: hypoventilatory (Hypercapnic) respiratory failure	10
- Type III (Perioperative) respiratory failure:	11
- Type IV (Hypoperfusion) respiratory failure	12
Causes of respiratory failure	12
CHRONIC OBSTRUCTIVE PULMONARY DISEASE (COPD)	14
- Definitions.....	14
- Diagnosis.....	15
- Epidemiology	16
- Risk factors	16
- Pathology and structural effects	18
- Classification of severity.....	29
ACUTE EXACERBATION OF COPD (AECOPD)	30
- Acute respiratory failure in patients with COPD	30
- Pathophysiology of acute respiratory failure in COPD.....	31
- Etiology and precipitating factors	32
- Management of AECOPD	33
- Therapeutic intervention.....	34
- Ventilatory support.....	38
VENTILATORY SUPPORT FOR ACUTE ON TOP OF CHRONIC RESPIRATORY FAILURE	39
Basic principles of ventilation COPD patients.....	39
- Avoiding hyperinflation.....	39

- Managing Auto-PEEP.....	40
- Permissive hypercapnia.....	40
- Patient-Ventilator synchrony.....	41
Noninvasive positive pressure ventilation (NPPV).....	43
- Historical perspective.....	44
- Rationale for use of Noninvasive positive pressure ventilation.....	45
- NIV Interfaces.....	47
- Modes of noninvasive ventilation.....	50
- Complications and Adverse Effects of Noninvasive Ventilation.....	55
- Effects of NPPV on Patient Outcomes.....	56
- Predictors of success of NIPPV.....	56
- Criteria of termination of NIPPV and switching to Invasive ventilation.....	56
Invasive mechanical ventilation	57
- Indications.....	57
- Peri-intubation risk	58
- The basic settings of ventilating COPD patients.....	59
-Traditional modes of invasive ventilation for COPD patients.....	66
- New modes of mechanical ventilation.....	69
New modes of mechanical ventilation.....	70
- Complications of Invasive Ventilation in COPD patients.....	82
WEANING OF COPD PATIENTS FROM MV.....	83
- The conditions required before initiating weaning from MV.....	84
- Weaning predictors.....	84
- Methods of weaning.....	98
- Spontaneous breathing trials (SBT).....	99
- New methods of weaning.....	106
- Weaning Failure.....	113
- Extubation.....	116
- Reintubation.....	121
Discharge criteria for ACOPD patients from ICU.....	122
Summary.....	123
