## LIST OF Table

Table	Page
Table (A): Braunwald clinical classification of unstable angina, from Braunwald E 1989	24
Table (B): Primary prevention trial of statin therapy	30
(C): Secondary prevention trials of statin therapy	31
Table (1): Comparison between two groups as regard demographics, past history	45
Table (2): Comparison between the two groups as regards vital data	47
Table (3): Comparison between the two groups as regards Diagnostic tests done on admission	49
Table (4): Comparison between the two groups as regard ECG done on admission.	51
Table (5): Comparison between two groups as regards Echocardiography & EF	52
Table (6): Comparison between two groups as regard changes of Canadian Class Score (CCS) on admission & after 15 days	53
Table (7): Comparison between two groups as regard Canadian Class Score (CCS) after 15 days of follow up	54
Table (8): Comparison between two groups as regard incidence of complication	55
Table (9): Study of complication occurred in group I	56
Table (10): Study of complication occurred in group II	57
Table (11): Comparison between two groups as regards complications	58
Table (12): Comparison between hs- CRP on admission and 2 weeks after in Each group.	60
Table (13): Comparison between two groups as regard hs- CRP after 15 days	61
Table (14): Comparison between complicated and non complicated patients of both groups as regard level of hs-CRP	62

## List of Figure

Figure	Page
Fig. (A): Markers of inflammation	16
Fig. (B): Schematic of causes of U,A .	20
Fig. (C): Cholechicine Pharmacology	34
Fig. (1): Difference between two groups as regard age	45
Fig. (2): Difference between two groups as regard sex.	46
Fig. (3): Demographics, past history of both groups	46
Fig. (4): Difference between two groups as regard hemodynamics	47
Fig. (5): Difference between two groups as regard HS-CRP	50
Fig. (6): Difference between two group as regard EF by ECHO	52
Fig. (7): Difference between two groups as regard CCS on admission and after 15 days.	54
Fig. (8): Difference between two groups as regard incidence of complication	55
Fig. (9): Comparison between two groups as regard complication	58
Fig. (10): Comparison between two groups as regards short- term mortality	59
Fig. (11): Comparison between hs- CRP on admission and 2 weeks after in Each group	60
Fig. (12): Comparison between the two groups as regards CRP after 2 weeks	61
Fig (13): Comparison between complicated and non complicated patients of both groups as regard level of hs-CRP	62
