

❧ Acknowledgement ❧

*First and foremost, thanks to **ALLAH** to whom I always pray asking him to pave my way and give me the power to do my best.*

*I would like to express my deepest gratitude and thanks to **Prof. Dr Ahmed Farid Youssef** , professor of Diagnostic Radiology, Faculty of Medicine, Benha University; for his continuous kind supervision; generous advices and endless ideas for this work to be achieved. Indeed, it has been a privilege for me to be under his sincere supervision.*

*My deepest appreciation to **Dr Hesham Mohamad farouk** assistant professor of Radiodignosis, Faculty of Medicine, Benha University, for his great help, continuous guidance and appreciated cooperation.*

*I wish to express my sincerest and respectful gratitude to **Dr Osama Galal** Lecturer of Radiodignosis, Faculty of Medicine, Benha University, for his kind cooperation, valuable aid and keen supervision*

*Finally I would like to thank all may **senior staff** and **colleagues** in the department of Diagnostic Radiology, and my **family** to their kind help.*

CONTENTS

Subjects	Page
❖ Introduction and Aim of the work	1
❖ Anatomy	5
♦ Applied Anatomy of uterus.	5
♦ Transvaginal Sonographic anatomy of uterus.	9
♦ MRI anatomy of uterus.	17
❖ Technique.	21
♦ Technique of Transvaginal Ultrasound.	21
♦ Technique of Magnetic Resonance.	24
❖ Pathology of Adenomyosis.	29
❖ Imaging.	40
♦ Transvaginal Sonographic finding in Adenomyosis.	42
♦ MRI findings in Adenomyosis.	45
♦ MRI versus TVS.	66
❖ Summary and Conclusion .	69
❖ References.	75
❖ Arabic Summary.	1

LIST OF ABBREVIATIONS

BH T2FSE	breath hold turbo T2 fast spin echo
ER	oestradiol receptor.
ESP	echo spacing
ETL	echo train length
FO V	field of view.
FSE	fast spin echo sequence
GNRH	gonadotrophic releasaing hormone
HASTE	half -fourier single shot turbo.
HSG	hysterosalpingography
JZ	junctional zone
MRI	magnetic resonance imaging
NPV	negative predictive value
NSA	number of signal averages
PPV	positive predictive value
SSFSE	single shot fast spin echo
TE	echo time
TGSE	turbo grase spin echo
TR	repetition time
TVS	transvaginal sonography
UAE	uterine artey embolization
US	ultrasound

LIST OF Figures

Figure number	Content of figure	Page number
Figure 1	Medial sagittal section through the femal pelvis	6
Figure 2	Uterine blood supply	8
Figure 3	TVS of normal endometrium as depicted in long axis	10
Figure 4	TVS of normal endometrium as depicted in short axis	11
Figure 5	TVS of proliferative phase of endometrium	14
Figure 6	TVS of the preovulatory phase of endometrium	14
Figure 7	TVS of the secretory phase of endometrium	15
Figure 8	TVS of the menstrual phase of endometrium	16
Figure 9	MRI of normal uterus	17
Figure 10	The uterine zonal anatomy	20
Figure 11	Diffuse adenomyosis from a hysterectomy specimen	30
Figure 12	Focus of adenomyosis on microscope	31
Figure 13	Leiomyomata uteri	32
Figure 14	Tvs shows myometrial heterogencity,linear striations and irregular endo/myometrial interface	43
Figure 15	Adenomyosis at MRI	47

Figure 16	Sagittal T2FSE MRI shows thickened junctional zone	47
Figure 17	Sagittal T2FSE of uterus with focal adenomyomas	48
Figure 18	Sagittal T2FSE shows myometrial thickness ratio over 40%	49
Figure 19	MRI shows Adenomyoma and leiomyoma in 45 year old woman	50
Figure 20	MRI shows Adenomyosis in 35 year old woman	50
Figure 21	MRI shows Atypical polypoid adenomyoma in 42 year old woman	51
Figure 22	MRI shows Diffuse adenomyosis with illdefined myometrial mass	52
Figure 23	MRI shows Intramyometrial adenomyotic cyst	53
Figure 24	MRI shows Thickening of the jz during the menstrual phase	54
Figure 25	Fluctuating MRI appearances of adenomyosis	55
Figure 26	Adenomyosis with haemorrhagic foci in 52 year old woman	56
Figure 27	Pseudowidening of the endometrium in 49old women	57
Figure 28	Endometrial cancer extending into adenomyosis in 48 year old woman	58
Figure 29	Adenomyosis in 47 year old woman	59
Figure 30	Endometrial cancer with adenomyosis in 54 year old woman	59
Figure 31	Adenocarcinoma arising from	60

	adenomyosis in 71 year old woman	
Figure 32	Myometrial contraction in 30 year old woman	61
Figure 33	Subserosal endometriosis in 43 year old woman	62
Figure 34	MRI shows diffuse adenomyosis with a small posterior wall fibroid	64
Figure 35	MRI shows the difference between findings of myomas and adenomyosis	65
Figure 36	TVS shows myometrial heterogeneity and small myometrial cyst	68
