

III

Contents

Inroduction.....	1
Aim of the work.....	3
Chapter 1(Immunoglobulins and monoclonal antibodies).....	4
Chapter 2 (Nanobodies and its applications).....	42
Conclusion and Summary.....	90
References.....	92
Arabic summary.....	120

List of figures

Figure 1(Antibody isotypes of mammals).....	10
Figure 2(Antibody complex).....	12
Figure 3(Immunoglobulin diversity).....	17
Figure 4 (Hybridoma cell production).....	28
Figure 5(Monoclonal antibody therapy).....	32
Figure 6 (Nanobody and its applications).....	43
Figure 7 (Schematic representation of the conventional (top)heavy-chain IgG antibodies (bottom) present in camelid serum.....	60

List of tables

Table1(Antibody isotopes of mammals).....	10
Table 2(FDA approved monoclonal antibodies).....	39

IV

Table 3 (Advantage of camelid single domain antibody fragments as compared to conventional antibody ragments).....	65
Table4(Examples of therapeutic applications of camelid VHHs).....	74
Table 5(Summary of improvement in the systemic pharmacokinetic parameters of drugs incorporated in different nano carriers system).....	85
