

CONTENTS

Title	Page
Chapter 1: Introduction.....	1
(1-1) General	1
(1-2) Atmospheric physics and solar radiation.....	3
(1-3) Atmospheric chemistry	5
(1-3-1) Homosphere	6
(1-3-2) Heterosphere	6
(1-3-3) Chapman Reaction	6
(1-4) Types of Ozone	7
(1-4-1) Physical Properties of Ozone	8
(1-4-2) Chemical Properties of Ozone	8
(1-5) Ozone Hole	11
(1-6) Green House Gases	12
(1-6-1) Green House Effects in Earth's Atmosphere	13
(1-7) Atmospheric Particles and Dust	15
(1-7-1) Particulates and Aerosol	15
(1-7-2) Effects of aerosols on electromagnetic radiation	16
(1-7-3) Climate Effects	16
(1-7-4) Dust and Optical properties	17
(1-7-5) Dust Storm	18
A Review on Previous Works	20
 Chapter 2 Total and Surface Ozone Distributions	 31
(2-1) General.....	31
(2-2) Ground and Satellite Measurements	33
(2-2-1) Ground Measurement of Total Amount of Ozone over Egypt	33
(2-2-2) Satellite Measurement of Total Amount of Ozone over Egypt	39
(2-2-3) Comparison between Ground and Satellite Measurement	44
(2-2-4) Satellite Measurement of Total Amount of Ozone over Kuwait	51
(2-3) Temperature Variation	54
(2-4) Variation of Total Amount of Ozone with temperature and Latitude.....	58
(2-4-1) Variation of Total Amount of Ozone with Temperature	58
(2-4-2) Variation of Total Amount of Ozone with Latitude.....	59
(2-5) Surface Ozone Measurements and Interpolation.....	66
(2-5-1) Surface Ozone Interpolation.....	66
(2-5-2) Surface Ozone Measurements over South Valley.....	67
(2-5-3) Comparison between Measurements and Interpolation.....	68
 Chapter 3 Emissions of some Green House Gases.....	 76
(3-1) General.....	71
(3-2) Variations in Carbon Dioxide.....	72
(3-2-1) Measurement in Kuwait city.....	73
(3-3) Effect of Carbon Dioxide on Temperature.....	76
(3-4) Fluxes and Concentrations of Carbon Dioxides at AL-JAHRA and CAIRO.....	78
(3-4-1) Method and Material.....	78
(3-4-2) Variations of Carbon Dioxide over Al-Jahra	81
(3-5) Radiation.....	86
(3-5-1) Solar Radiation.....	86
(3-5-2) Solar and UV Radiations comparison Variation.....	87

(3-6) Green House Gases Variations.....	89
(3-7) Relation between variation GHG and Temperature.....	93
(3-8) Climate change	95
 Chapter 4 Dust Storms: characteristics and behaviour	97
(4-1) General.....	98
(4-2) Dust Storm.....	99
(4-2-1) Frequency of Dust Storm measurements.....	99
(4-2-1-1) Monthly and Seasonal Variation of Dust Storm.....	104
(4-2-1-2) Monthly and Seasonal Variation of Dust Storm and GHG in percentage.....	106
(4-2-2) Monthly Variations: of PM10 and Dust Storm.....	107
(4-2-3) Use of Hysplit model:	115
(4-2-3-1) Some Hysplit trajectory over Al-JAHRA.....	116
(4-2-3-2) Hysplit Model over Mansoria.....	123
(4-2-3-3) Hysplit Model over UM Al-HEMAN.....	130
(4-2-3-4) Monthly Comparison Hysplit of the three stations.....	137
(4-2-3-5) Comparison between Al-JAHRA and Mansoria stations.....	143
(4-2-3-6) Comparison between Hysplit Model plots and Dust Storm measurements.....	144
(4-3) Variation of PM10 with Radiation.....	145
(4-3-1) Variation of PM10.....	145
(4-3-2) Variation of UV/Solar Radiation and Dust.....	147
(4-4) Special Case Study.....	149
 Chapter 5: Study Effect of increasing CO2 by using RegCM Model.....	156
(5-1) General.....	157
(5-2) Background on Regional Climate Model.	157
(5-2-1) The RegCM Model Horizontal and Vertical Grid.....	159
(5-3) The effect of increase of CO2 on Temperature.....	165
(5-4) The effect of increase CO2 on Wind.....	170
(5-4-1) The effect of increase CO2 on Wind (U)	170
(5-4-2) The effect of increase CO2 on Wind (V)	174
(5-5) The effect of increase CO2 on Rain.....	180
(5-6) The difference between with increase CO2 and without in different situation.....	184
General Summary and Conclusions.....	188
References.....	196
