

Table of Contents

Abstract	i
Table of Contents	iii
List of Figures	vi
List of Tables	x
CHAPTER I: Introduction	1
1.1 General.....	1
1.2 Objective of this work.....	2
1.3 Contents of thesis.....	3
CHAPTER II: Literature Review	5
2.1 Introduction.....	5
2.2 Numerical methods.....	6
2.2.1 The Finite difference method (FDM).....	7
2.2.2 The Finite element method (FEM).....	8
2.2.3 The Boundary element method (BEM).....	11
2.2.4 The Charge simulation method (CMS).....	13
2.3 Genetic algorithms (GAs).....	17
2.3.1 Introduction to genetic algorithms.....	17
2.3.2 Components of binary genetic algorithms.....	19
2.3.3 Creating an initial population	21
2.3.4 Evaluating the fitness.....	21
2.3.5 Genetic algorithms operators.....	21
2.3.5.1 Natural selection.....	21
2.3.5.2 Selection.....	23
2.3.5.3 Mating.....	26
2.3.5.4 Mutations.....	27
2.3.5.5 Terminating algorithms.....	28
2.4 literature review of optimization of the charge simulation method (CSM).....	29

CHAPTER III: Optimal Charge Allocation in the Charge Simulation

Method for Sphere-Plane Gaps	37
3.1 Introduction.....	37
3.2 Geometric details of sphere-plane model.....	38
3.3 CSM Model details.....	38
3.4 GA-CSM details.....	41
3.5 Results and discussion.....	44
3.5.1 Fixed case.....	44
3.5.2 Semi-Moving case.....	52
3.5.3 Moving case.....	64
3.5.4 Comparison between three cases.....	74
3.5.5 Techniques for improving the accuracy in sphere-plane gaps.....	76

CHAPTER IV: Introduction to the Method of Fundamental Solution (MFS) with Application to Field Solution of a Sphere between Two Parallel Plates

87

4.1 Introduction.....	87
4.2 Recent applications of MFS.....	89
4.3 The MFS formulation for Laplace's equation.....	91
4.4 Geometry of Model and details.....	93
4.5 Results and discussion.....	96
4.5.1 Numerical solutions.....	96
4.5.2 Comparison with analytical solution.....	104
4.5.3 The effect of changing the radius of spherical particle.....	105
4.5.4 Comparison between the method of fundamental solution (MFS) and charge simulation method (CSM).....	109

CHAPTER V: Application of the Method of Fundamental Solution (MFS) for Computation of Charges and Forces on a Spherical Particle between Two Parallel Plates.....	115
5.1 Introduction.....	115
5.2 Asymptotic expressions.....	119
5.3 Numerical solution.....	121
5.4 Coefficients of capacity of a sphere between two planes.....	123
5.4.1 Analytical expressions.....	123
5.4.2 Numerical simulation and comparison.....	124
5.5 Electric force exerted on a sphere between two parallel electrodes.....	126
5.6 Electric field between the sphere and the electrode.....	132
 CHAPTER VI: Conclusions.....	 136
REFERENCES.....	139
Appendix.....	147
