|---------------------------------------------------------------------------------|----------|
| Abstract.....                                                                   | iii      |
| Acknowledgements.....                                                           | iv       |
| Table of Contents.....                                                          | v        |
| List of Tables.....                                                             | ix       |
| List of Figures and Illustrations.....                                          | xi       |
| List of Symbols, Abbreviations and Nomenclature.....                            | xv       |
| <b>CHAPTER 1: INTRODUCTION.....</b>                                             | <b>1</b> |
| 1.1 MOTIVATION.....                                                             | 1        |
| 1.2 FUNDAMENTAL CONCEPTS.....                                                   | 2        |
| 1.3 OBJECTIVES.....                                                             | 4        |
| 1.4 OUTLINE OF THE THESIS.....                                                  | 4        |
| <b>CHAPTER 2: BACKGROUND.....</b>                                               | <b>8</b> |
| 2.1 OVERVIEW OF AIRBORNE LASER SCANNING (ALS) – LIDAR.....                      | 9        |
| 2.1.1 Discrete-Return Systems.....                                              | 12       |
| 2.1.2 Full Waveform Systems.....                                                | 12       |
| 2.2 OVERVIEW OF IMAGING SYSTEMS.....                                            | 13       |
| 2.2.1 Advantages of Digital Images over Analog ones.....                        | 14       |
| 2.2.2 Approaches to the Design of Digital Aerial Cameras.....                   | 15       |
| 2.2.2.1 <i>Systems Based On Linear Array Scanners (Push-Broom)</i> .....        | 15       |
| 2.2.2.2 <i>Systems Based On Area Arrays</i> .....                               | 15       |
| 2.3 IMAGING VERSUS LIDAR SYSTEMS.....                                           | 17       |
| 2.4 LAND COVER CLASSIFICATIONS.....                                             | 19       |
| 2.4.1 Supervised Versus Unsupervised Classification.....                        | 21       |
| 2.4.2 Pixel-Based Versus Object-Based Classification.....                       | 23       |
| 2.5 COMBINING CLASSIFIERS.....                                                  | 24       |
| 2.5.1 Classifier Ensembles.....                                                 | 25       |
| 2.5.1.1 <i>Bagging or Boosting</i> .....                                        | 25       |
| 2.5.1.2 <i>Random Feature Selection</i> .....                                   | 26       |
| 2.5.2 Multiple Classifier Systems.....                                          | 27       |
| 2.5.2.1 <i>Optimum classifiers selection (OCS)</i> .....                        | 27       |
| 2.5.2.2 <i>Output Based Approach of Classifiers</i> .....                       | 28       |
| 2.5.2.3 <i>Uncertainty Based Approach</i> .....                                 | 28       |
| 2.6 FEATURE EXTRACTION FROM AERIAL IMAGERY AND/OR LIDAR DATA.....               | 29       |
| 2.6.1 Building Detection.....                                                   | 29       |
| 2.6.1.1 <i>Lidar Data as a Single Data Source for Building Extraction</i> ..... | 30       |
| 2.6.1.2 <i>Building Extraction by Aerial Images and Lidar Data fusion</i> ..... | 31       |
| 2.6.2 Road Extraction.....                                                      | 33       |
| 2.6.2.1 <i>Lidar Data as a Single Data Source for Road Extraction</i> .....     | 34       |
| 2.6.2.2 <i>Road Extraction by Aerial Images and Lidar Data Fusion</i> .....     | 35       |
| 2.7 SUMMARY.....                                                                | 36       |
