

**THE LEADERS TRAINING SYSTEMS OF
EDUCATION AND LEARNING AT THE CENTER OF
PREPARING THE GOVERNMENT LEADERS
"EVALUATION STUDY"
ACCORDING THE STANDARDS OF TATAIAL Quality.**

The case of humman developing in now day had the occupancy of necessiry (in teresting) in the escape of scientific research.

The Aims

And the humman being is cansiderednal only a wean but also the aim of the can tralaim of development al pacers and the aim for the ted ration that paint to the development is "Human developing the gurautedted by the humman mean far the humman favaur or gaudiness.

And in addition to that in our recent age all of use belivedia that the peeferable or the advantage-will be far the humman mind in dustrialr [humman mind farming] with the concentrating an the best means which create the preference far the humman industrial. And in ardor to help this provision spread we need to great working farce-in the structure-from the top till the bottom. And the campitian and the combat get represented in, haw-can the pawed mind mpirir mental-creat new technology? And the performance of qualiety and manner will be great at the judging an⁽¹⁾.

good standards- systems –which have the ability to face the needs of the following century with all its new features and characteristics.

And owing to the necessity of these matters we can see in creating the interest to prepare and develop the program of the leader training in noticeable way and in order to prepare them well is a principle step in the education operation which had a great care from the government. And that can appear from the presidential address when he said:

1- we must direct more attention in order to develop our human resources in the different sides in life. Because the human resource become the most and the best element in achieving the progress. And building the wealth of nations also in creating their abilities to holding out and the competing- the competition in the universal market. As well as, the future industry and its production will depend on [rely on] the abilities of working category [class] in applying the science and using the discoveries of the development researching

From the presidential address-Mohammed Hani in the warders feast the Egyptian ashram news so, molding the leaders is one great step from the principle steps which must be followed in the matter of development, in order to achieve the quality Education which help us to go to with the universal changes Because the quality Education became an important step in the competition and goodness which can't be achieved except during the preparation and the good built. And this quality will result from the participation and co-operation among all the people who will get useful from the education and training service, that is found or presented in the training center which help us in putting and limiting the description which must be saved in the or found in the good leader who is prepared well for all the needs of human development.

٢٠٥

And this was the content (the matter) of our research which went in the following steps.

Firstly of problem of the research:

And the problem of research is summarized in the following principle questioner.

How can we develop the program system: of preparing and training the ducatian leader and the learning at the leader preparation center of the averment according to the life long learning philosophy?

And from the last question we can have may branches questions. As the following question.

- 1-what is the philosophy of the long life to aching or [continues learning]? And what are the dire ctian and a pinion in it?
 - 2-what is the leadership ? and what are the treatise which the leadership discussed?
 - 3-What are the establishments of preparing the leaders in Egypt ? and the historical sitting or starch [foundation]
 - 4-What are the theories and the new direction are opinion in the matter of preparing the leaders at this center according to the philosophy of cantinas learning?
 - 5-What are the advantage and disadvantage in the training program at the center of leader preparation?
 - 6-What are the participation's of the preparation leader center in developing the learning process?
-

The aims of the research

Knowing to the extend of developing what extend there is chances to develop the systems or program of preparing the government leaders according to the standard of total quality.

Thirdly :

The outline of the research :

The outlines of the research are shortened in the following sides.

- 1- the human side which specialized in teaching the state of the workers at the center.
- 2- The objective side which concentrated on or specialized –the research- in teaching some problem of the leader e.g. vocational problem, administrative problem, their needs and sharing the trainer.
- 3- The geographical side (concentrating on the provincial of Cairo, Kalyubia, Sharkia and EL Mena).

Fourthly:

The syllabus of the research the research used: the analytical demonstrative syllabus and from its means is teaching testate or describing the state. And the purpose for that is to group the different knowledge about the establishments and the centers of preparing the leaders in Egypt.

Fifth

The means of the research the research used the form of which is applied in a class group during and after the period of pre training program to know their opinion and their reaction also, the angsts which faced them during their training at the center of the leaders preparation. so

The sixth point :the steps of the research and teaching and in order to achieve the aim of the research. The planing was done as the following the first step: the general outline of the rear

Ch: undo it had the problem preface, the necessity , the aims, the syllabus, the samples specimen, the last the second step the phylasphy of life long learning in all the life and the mast important direction or opinion.

3-The third step:

Training the leadership at the center of preparing the leaders.

4-the faurlthstep: the most important thearies and opinion in the matter of preparing the leader. The second section from the research and it cantians three steps.

5-The Fifth Stop : and it connect with the way of making evaluation teaching to the program of training according to the standard of total quality

6-The sixth step: and it cannect with sides of advantage and disadvantage of the program of training

7-The senth step: The Result And The dices which is in the research.

Last not least the ending, the book which were used (in Arabic and English). And the sum of the research in A vatic, English the research arrived with Analysis view to many results, that can be summarized asin the following points

1- were must pay attention to the trainers and depend on the specialized from the trainers. And we must do our best in chasing them, also we should train them by using the modern style which state are contain eh plans of program of the training of its using besides training them an using the ways of making interaction with the adult learner to make them- the a dultlearner- do a good results

- 2- we must get useful from the system of obligation nomination in the ministry of public heats. And that can be Done by sending leader who trained to goat aprivat leptamet in adult education. And that is to save the chance to have a great and much knamledg in the ieaching besides that it will open the way to have the degree of [master in education and Dactar in education].
- 3- Once principle from the principles of the total quality is the continuous learning and developing for the personas and the establishment S.So, memust push them to lifelong learning a long the life by the way of connecting teaching programs or by having high degree and doing accadmicscience level to develop and improve the leader's performance.
- 4- We must pay alternation to the matter that we mest increase the budget of the many in order to suppait the natives which en caurages in successceding the programs. And save the traipsing needs which participate in improving the level of performance in planing and a chieving the future program beside the participation in the development aims.
- 5- We must in vent a new way or process in mending the leader's performance. In way which is mare clever and fact on cantitian that it must men it his actual perforce during steps grawp that are necessary for the practical leadership. And is one principle from the principles of total quality
- 6- The research suggested many practical device can be followed in the process of developing the way of training the education leadership and learning at the center of preparing the leaders according to the total of quality standard for the reader training program.
- 7- The tutorial quality in the matter of preparing the leader result from scientific fact and this fact is (the society's need must be achieved)

3.1

because it is the society that will get the useful from the learning and training service in the training center. And in order to do that the teaching put same stand and that helps the tutorial quality to develop and improve the leader's performance

- 8- We must hold up training tournaments and giving full lecture about the meaning of total quality, its administrative means and the conditions needed for it also, the requires of qualifying it for all the workers at the temple organization to raise up their culture level about the total quality and the way of administration there. And that can be followed by following what the sings that result from the teaching field- pointed to. And these sings pointed to the low of culture level of same worker about the meaning and definitions of the total quality which makes the future looking of view get so weak at some of them. So we must put teaching program connect scientifically with the new in the world of futurism
