ACKNOWLEDGEMENT	I
ABSTRACT	II
TABLE OF CONTENTS	III
LIST OF TABLES	VII
LIST OF FIGURES	IX
LIST OF PHOTOS	XVII
LIST OF CHARTS	XXII
ABBREVIATIONS	XXIII
CHAPTER 1 INTRODUCTION	1
1.1 GENERAL	1
1.2 RESEARCH OBJECTIVES	2
1.3 RESEARCH PLAN	2
1.4 THESIS LAYOUT	2
CHAPTER 2 LITERATURE REVIEW	3
2.1 INTRODUCTION	4
2.2 Principle Definitions	4
2.2.1 Specific Heat	4
2.2.2 Thermal Conductivity	4
2.2.3 Thermal Capacity	4
2.2.4 Thermal Diffusivity	4
2.2.5 Fire Resistance	4
2.2.5.1 Strength	4
2.2.5.2 Deformation	4
2.2.5.3 Stiffness	4
2.2.5.4 Modulus of elasticity	4
2.2.5.5 Ductility	5
2.2.5.6 Toughness	5
2.3 EFEECT OF FIRE ON CONCRETE AND STEEL REINFORCEMENT	5
2.3.1 Concrete	5
2.3.1.1 Normal Strength Concrete	6
A-Thermal properties of normal-weight concrete	6
B-Mechanical properties of normal-weight concrete	7
2.3.1.2 Light Weight Concrete	8
A-Thermal properties of light-weight concrete	8

	B-Mechanical properties of light -weight concrete	8
	2.3.1.3 High Strength Concrete	9
	A-Thermal properties of high strength concrete	10
	B-Mechanical properties of high strength concrete	11
2.3.2	Reinforcement	12
	A-Mechanical properties	12
	2.3.2.1 Strength	12
	2.3.2.2 Modulus of elasticity	12
	2.3.2.3 Stress-strain relationship	12
	2.3.2.4 Thermal expansion	12
2.3.3	Bond Between Concrete and Steel Reinforcement	12
2.4	EFFECT OF FIRE ON REINFORCED CONCRETE FLEXURAL AND COMPRESSION MEMBERS	13
2.4.1	Effect of Fire on Reinforced Concrete Beams	13
	2.4.1.1 Normal Strength Concrete Beams	13
	2.4.1.2 High Strength Concrete Beams	14
2.4.2	Effect of Fire on Reinforced Concrete Columns	14
	2.4.2.1 Normal Strength Concrete Columns	14
	2.4.2.2 High Strength Concrete Columns	19
	2.4.2.3 Spalling of High Strength Concrete	21
	2.4.2.3.1 A conventional explanation of the cause of spalling in concrete	22
	CHAPTER 3 EXPERIMENTAL WORK	41
3.1	INTRODUCTION	41
3.2	MATERIALS PROPERTIES USED	41
3.2.1	Fine and Coarse Aggregate	41
	I Fine Aggregate	41
	II Coarse Aggregate	41
3.2.2	Cement	42
3.2.3	Steel Reinforcement	42
3.2.4	Water	42
3.2.5	Silica Fume	42
3.2.6	Super plasticizer	42
3.3	EXPERIMENTAL PROGRAM	43
3.3.1	Reinforced Concrete Beams	43
	3.3.1.1 Specimens Preparation	45
	3.3.1.2 Testing Strategy	45

3.3.1.3	Techniques of Firing the RC Beams	46
3.3.1.4	Technique of Testing the RC Beams in the Flexural Strength Test Facility	47
3.3.2	Reinforced Concrete Columns	47
3.3.2.1	Specimens Preparation	50
3.3.2.2	Testing Strategy	51
3.3.2.3	Techniques of Firing the RC Columns	51
3.3.2.4	Technique of Testing the RC Columns in the Compressive Strength Facility	52
CHAPTER 4 ANALYSIS OF THE EXPERIMENTAL RESULTS OF REINFORCED CONCRETE BEAMS		76
4.1	INTRODUCTION	76
4.2	Normal Strength Concrete Beams (NSCB)	76
4.2.1	Compressive Strength of Concrete Mixes	76
4.2.2	Temperature Development of Surface of the Tested Beams	
4.2.3	Flexural Strength Test Result	
	A. Initial Cracking load [p _{cr}]	78
	B. Displacement at Initial Cracking load [Δ_{cr}]	79
	C. The Ultimate Load [P _{ult}]	80
	D. Displacement at ultimate load [Δ_{ult}]	81
4.2.4	Modes of Failure of The Tested Beams	82
4.3	HIGH Strength Concrete Beams (HSCB)	82
4.3.1	Compressive Strength of Concrete Mixes	82
4.3.2	Temperature Development of Surface of The Tested Beams	82
4.3.3	Flexural Strength Test Result	83
	A. Initial Cracking Load [P _{cr}]	83
	B. Displacement at Initial Cracking [Δ_{cr}]	84
	C. ultimate load [p _{ult}]	85
4.3.4	Modes of Failure of The Tested Beams	87
CHAPTER 5 ANALYSIS OF THE EXPERIMENTAL RESULTS OF REINFORCED CONCRETE COLUMNS		120
5.1	INTRODUCTION	120
5.2	Normal Strength Concrete Columns (NSCC)	120
5.2.1	Compressive Strength of Concrete Mixes	120

5.2.2	Temperature Development of Surface of the Tested Columns	120
5.2.3	Compressive Strength Test Results	122
	A. The Ultimate Load [Pult]	122
	B. Displacement at ultimate load [Δ_{ult}]	123
5.2.4	Modes of Failure of the Tested Columns	123
5.3	HIGH Strength Concrete Columns (HSCC)	124
5.3.1	Compressive Strength of Concrete Mixes	124
5.3.2	Temperature Development of Surface of The Tested Columns	124
5.3.3	Compressive Strength Test Results	125
	A. The Ultimate Load [Pult]	125
5.3.4	Modes of Failure of the Tested Columns	126
CHAPTER 6 SUMMARY AND CONCLUSION		161
REFERENCES		165
APPENDIX A		
	1-FOR NSC COLUMNS	169
	2-FOR HSC COLUMNS	172
APPENDIX B		
	RESEARCH PAPER	175
