Chapter(1)

1-Introduction	1
1.1.General introduction	1
1.2 Literature survey of ligands	2
1.2.1 Literature survey of Schiff bases	2
1.3.Literature survey of transition metal ions determination	5
1.3.1.Conductometric determination of transition metal ions	5
1.3.2.Potentiometric determination of transition metal ions.....	6
1.3.3.Spectrophotometric determination of transition metal ions.....	9
1.3.4.Determination of transition metal ions with different analytical methods	17
1.4.Literature survey of complexes	24
Aim of the work	46

Chapter(II)

2-EXPERIMENTAL.....	47
2.1.Materials and reagents	47
2.2.Preparation of the Schiff base	47
2.3.Apparatuses	49
2.4.Synthesis of metal complexes	49
2.5.Organic solvents	50
2.6.Solutions	50

2.7.Buffer solutions	51
2.8.Working Procedures	52
2.8.1.Electronic absorption spectra of free ligands in buffer solutions of varying pH.....	52
2.8.2.Electronic absorption spectra of free ligands in different organic solvents.....	52
2.8.3.Conductometric titration of transition metal ions; vanadium(V), zinc(II),silver(I), mercury(II), and copper(II):-----	52
2.8.3.1.Conductometric titration of vanadium(V)	52
2.8.3.2.Conductometric titration of zinc(II).....	53
2.8.3.3.Conductometric titration of mercury (II)	53
2.8.3.4.Conductometric titration of copper (II).....	53
2.8.3.5.Conductometric titration of silver (I).....	53
2.8.4.Potentiometric titration of zinc(II), copper(II),vanadium(V), silve(I) and mercury(II) complexes:	53
2.8.4.1.Potentiometric titration of acid mixture.....	54
2.8.4.2.Potentiometric titration of ligands	54
2.8.4.3.Potentiometric titration of metal-ligand complex.....	54
2.8.5.Specrophotometric determination of copper ,silver, mercury, vanadium and and zinc ions	54
2.8.5.1.Determination of vanadium(V)	54
2.8.5.2.Determination of copper(II).....	55
2.8.5.3.Determination of zinc(II)	55
2.8.5.4.Determination of mercury(II)	55
2.8.5.5.Determination of silver(I)	55
2.9.Studies on the solid chelates	56
2.9.1.Electronic absorption spectra of the solid chelates.....	56
2.9.2.Infrared spectra of solid chelates	56

2.10.Applications	56
2.10.1.Determination of vanadium in deposits of combustion	56
2.10.2.Determination of zinc in zinc anodes.....	57
2.10.3.Determination of mercury in synthetic solution	57
2.10.4.Determination of copper in waste water	57
2.10.5.Determination of silver in synthetic solution.....	57

Chapter(III)

3-RESULTS AND DISSCUSION.....	59
3.1.STUDIES ON THE ORGANIC LIGANDS	59
3.1.1.The spectral chartacteristics of the organic ligands	59
3.1.1.1.The electronic absorption spectra of Schiff bases compounds...	59
3.1.1.2.The electronic absorption spectra of the Schiff bases in ethanol	60
3.1.1.3.The electronic absorption spectra of the Schiff bases in different organic solvents -----	61
3.1.1.4.The spectral behavior of ligands under consideration in buffer solutions and the determination of their acid ionization constants ----	66
3.1.1.5.The electronic absorption spectra of the Schiff base ligands in buffer solutions	67
3.1.1.6.Infrared spectra of the studied schiff base compounds.....	72
3.1.1.7. H-NMR spectra of studied Schiff base compounds.....	74
3.2. STUDIES OF THE COMPLEXES IN SOLUTION	77
3.2.1.Conductometric titration studies	77
3.2.2.Potentiometric titration studies	81
3.2.3.Spectrophotometric studies	88
3.3.STUDIES ON THE SOLID COMPLEXES	136
3.3.1.Elemental analysis.....	136
3.3.2.Molar conductivity	136
3.3.3.Thermal analysis	139

3.3.4. Infrared absorption spectra of metal chelates with ligands under consideration	158
3.3.5. ^1H -NMR spectra of some complexes formed between I_b and I_c ligands and metal ions.....	165
3.3.6. Electronic spectra of some selected metal chelates.....	170
Summary and conclusion	176
References	178
Arabic summary	(٣ - ١)
