

List of content

*Introduction and aim of the work.....	1
*Review of literature	
° Chapter (1): physiology of pain.....	4
° Chapter (2): pediatric pain.....	17
° Chapter (3): caudal anesthesia.....	33
° Chapter (4): pharmacology of drugs.....	43
*Patients and Methods.....	54
*Results.....	62
*Discussion.....	81
*Conclusion.....	91
*Summary.....	92
*References.....	94
*Arabic summary.....	

List of Figures

Fig. (1): Model of the GABA-benzodiazepine receptor complex.....	12
Fig. (2): Category scale	27
Fig.(3): Visual analogue scale.....	28
Fig. (4): Graphic rating scales.....	29
Fig. (5): Numerical rating scales.....	29
Fig. (6): McGill Pain Questionnaire.....	31
Fig. (7): The short form McGill Pain Questionnaire.....	32
Fig. (8): Posterior surface of sacrum.....	35
Fig. (9): Caudal epidural blockade.....	39
Fig. (10): Continuous caudal technique.....	41
Fig. (11): The structure of ketamine.....	43
Fig. (12): The structure of Neostigmine.....	48
Fig. (13): Comparison between three groups as regards duration of postoperative analgesia.....	64
Fig. (14): comparison between three groups as regards pain score.....	66
Fig. (15): comparison between three groups as regards blood glucose level.....	69
Fig. (16): comparison between three groups as regards Cortisol level.....	71

Fig. (17): comparison between three groups as regards HR.....	73
Fig. (18): comparison between three groups as regards Bl.P.....	75
Fig. (19): comparison between three groups as regards SPO2.....	77
Fig. (20): comparison between three groups as regards Respiratory rate.....	79

List of Tables

Table (1): Classification of opioid receptors	10
Table (2): The adverse physiology effect of pain	22
Table (3): Ten points objective pain scale.....	26
Table (4): Contraindications to neuraxial blockade	37
Table (5): Muscarinic acetylcholine receptors	47
Table (6): Nicotinic cholinergic receptors	48
Table (7): objective pain discomfort scale (OPDS).....	59
Table (8): Motor power scale.....	60
Table (9): Comparison between three groups as regards the demographic data...	62
Table (10): Comparison between three groups as regards duration of postoperative analgesia	63
Table (11): comparison between three groups as regards pain score	65
Table (12): comparison between three groups as regards receiving of analgesia	67
Table(13): Comparison between three groups as regards blood glucose level	68
Table (14): comparison between three groups as regards Cortisol level.....	70
Table (15): comparison between three groups as regards HR	72

Table (16): comparison between three groups as regards Bl.P	74
Table (17): comparison between three groups as regards SPO2	76
Table (18): comparison between three groups as regards Respiratory rate	78
Table (19): Comparison between three groups as regards type of surgeries done in the three different groups	80
Table (20): comparison between three groups as regards Postoperative adverse effects	80
