List of Figures

Figures	Page
 Introduction:	
Fig.1. Rhinopathies: classification overview.....	VII
 Chapter (1):	
Fig.2. Lateral wall of the nasal cavity.....	3
Fig.3. CT scan imaging of the nasal cavities.....	4
Fig.4. Electron microscopy of cells in nasal Epithelium.....	5
Fig.5. Distribution of ciliated cells in the lateral and the medial wall and floor of the nasal cavity.....	7
 Chapter (2):	
Fig.6. Symptom severity in relation to autonomic response.....	30
 Chapter (3):	
Fig.7. Generation of nasal symptoms through neural pathways.....	45
Fig.8. Pathways through which the nasal nervous system interacts with the Immune system and with inflammatory processes.....	46
Fig.9. the anatomy of the pterygopalatine fossa showing vidian nerve.....	50
Fig.10. Nasal respiratory mucosa in health & disease (VMR).....	70
Fig.11. Ultrastructure of nasal respiratory epithelium from a patient with VMR...	72
Fig.12. nasal respiratory epithelium of healthy subject compared with VMR patient as Regard of NADPH-d activity	74
Fig.13. NADPH-d activity in VMR patient	75

Figures

Page

Fig.14. Strong 3NT immunostaining is observed in the nasal respiratory epithelium in VMR patients.....	80
Fig.15. 3NT immunostaining is absent in the glands and in a blood vessel in VMR Patients.....	81
Fig.16. 3NT immunostaining is not present in the cavernous sinuses.....	82

Chapter (4):

Fig.17. Algorithmic considerations for pharmacologic treatment of VMR.....	89
Fig.18. Schematic drawing of intranasal BTX injection sites.....	103
Fig.19. Sphenopalatine foramen, pterygoid canal and pterygopalatine ganglion.....	106
Fig.20. C-shaped incision is made on the lateral nasal wall (vidian neurectomy).....	107
Fig.21. Flap is elevated superiorly to expose the sphenopalatine artery and posteriorly to expose anterior face of the sphenoid sinus (vidian neurectomy).....	108
Fig.22. Freer elevator is used to perforate the anterior face of the sphenoid sinus.....	109
Fig.23. The vidian nerve is identified as it exits the vidian canal.....	110
Fig.24. Identification of site adjacent to the sphenopalatine ganglion block.....	112
Fig.25. Vanishing point in the lateral wall of the nose.....	113

List of Tables

Table	page
Table I. Nasal, otolaryngologic and systemic manifestations in study patients (n=78).....	26
Table II. Scores of presenting nasal symptoms in the study patients (range 0-5).....	27
Table III. Physical and laboratory data in study patients (n-78).....	28
Table IV. Autonomic function tests results in patients with rhinitis (n-78).....	29

List of Abbreviations

N.G.F	Nerve growth factor
N.O	Nitric oxide
N.P.Y	Neuropeptide Y
T.R.P.V1	Transient receptor potential vanilloid subtype1
V.I.P	Vasoactive intestinal Peptide
N.A.D.PH	nicotinamide adenine dinucleotide phosphate
N.A.R	non allergic rhinitis
N.O.S	nitric oxide synthase
S.P	substance P
V.M.R	vasomotor rhinitis
3N.T	3-nitrotyrosine
