

LIST OF FIGURES

5	The hepatic portal vein (often simply portal vein)	Figure 1
7	The left gastric vein	Figure2
12	How liver disease leads to bleeding varices	Figure 3
49	Practice guidelines of Primary Prevention of Esophageal Varice	Figure 4

ABBREVIATIONS

Beta	β
twice (two times) a day	BID
Balloon-occluded retrograde transvenous obliteration	B-RTO
Child Pugh	CHP
distal splenorenal shunt	DSRS
Endoscopic band ligation	EBL
Esophagogastroduodenoscopy	EGD
Endoscopic injection sclerotherapy	EIS
Endothelial nitric oxide synthase	eNOS
Endothelin-1	ET-1
Endoscopic variceal ligation	EVL
Fresh frozen plasma	FFP
Free hepatic vein pressure	FHVP
Gastrointestinal	GI
Genital reconstruction surgery	GRS
Gastro-variceal	GV
Haemoglobin	Hb
Hepatocellular carcinoma	HCC

Hepatic venous pressure gradients	HVPG
<u>Isosorbide mononitrate</u>	IMN

ISMN	Isosorbide-5-mononitrate
I.V	Intravenous
IVC	Inferior vena cava
NASH	Nonalcoholic steatohepatitis
NO	Nitric oxide
NSAIDs	Nonsteroidal anti-inflammatory drugs
PO	Per oral
RR	Relative risk
SBT	Sengstaken-Blakemore tube
TEG	Thromboelastography
TID	three times a day
TIPS	Transjugular intrahepatic portosystemic shunts
VS	Versus

Table of contents

page	Subject
I	List of figures
II	Abbreviations
1	Introduction and aim of the study
3	Anatomy and physiology of portal vein
9	Esophageal varices and portal hypertension
24	Primary prevention of esophageal varices
50	Acute variceal bleeding
83	Secondary Prevention of Esophageal Varices
99	References
