Quran	b	
Dedication	c	
Acknowledgement	d	
Table of Contents	e	
List of figures.	f	
List of tables	g	
List of Abbreviations	h	
Introduction	1	2
Aim of the study	3	
Chapter (1): Embryology & Anatomy of inguinal region	4	17
Chapter (2): Inguinal Hernia:	18	28
History	18	
Incidence	20	
Clinical Features	21	
Investigations	23	
Classifications of Groin Hernias	24	
Repair of Pediatric Inguinal Hernia	26	
Laparoscopic Inguinal Hernia	28	
Chapter (3): Management of Inguinal Hernia	29	48
Timing of Surgery	29	
Anesthesia	29	
Age for Overnight stay	30	
Options for Surgical Correction	31	
Conventional Open Repair	31	
Elective Cases	31	
Operative Management		
Post operative Complications	38	
Complicated Cases	43	
Operative Management	46	

Chapter (4):		
Minimal Accesss Surgery (MAS) & PerCutaneous (PCT) Techniques	49	77
Background	49	
Physiology of MAS	51	
Advantages, Disadvantages & complcations	53	
Applications of MAS in Hernia	55	
Techniques:	57	
Laparoscopic Repair	57	
Laparoscopic Assisted PCT Techniques	58	
Endoneedle Technique	58	
Lapaherclosure Technique	61	
Needle Holder Technique	64	
Syringe Needle Technique	66	
Reverdine Needle Technique	70	
Tissue adhesives	73	
Patients & Methods	78	88
Results	89	94
Discussion	95	103
Summary & Conclusion	104	114
References	115	123
Arabic summary	124	131
