

تشخيص و علاج اورام الحيزوم

دراسة مقدمة من

الطبيب/ عبدالحميد فتحى على

بكالوريوس الطب والجراحة

توطئة للحصول على درجة الماجستير
فى الجراحة العامة

تحت إشرافه

الأستاذ الدكتور/ حسن كمال الدين الصوينى

أستاذ الجراحة العامة

كلية طب بنها - جامعة بنها

الأستاذ الدكتور/ جمال حسين صالح

أستاذ مساعد الجراحة العامة

كلية طب بنها - جامعة بنها

الدكتور/ حسين جمال الجوهري

مدرس الجراحة العامة

كلية طب بنها - جامعة بنها

كلية طب بنها

جامعة بنها

٢٠١٠

LIST OF TABLES

Table No.	Title	Page
1	Incidence of primary mediastinal tumours and their relative frequencies	29
2	Incidence of primary anterosuperior mediastinal tumours.	30
3	Secondary masses of the mediastinum	31
4	Usual location of the common primary tumour and cysts of the mediastinum.	35
5	Mediastinal masses of vascular origin.	3v
6	Trastek and payre classification.	41
7	Post surgical staging of thymoma.	42
8	Clinical staging of mediastinal lymphoma.	49
9	Incidence of mediastinal neurogenic tumours.	59
10	Classification of neurogenic tumours.	61
11	Staging of neuroblastomas.	66
12	Pediatric oncology group staging system.	67
13	Modified clinical classification of patients with myathenia gravis.	83

LIST OF FIGURES

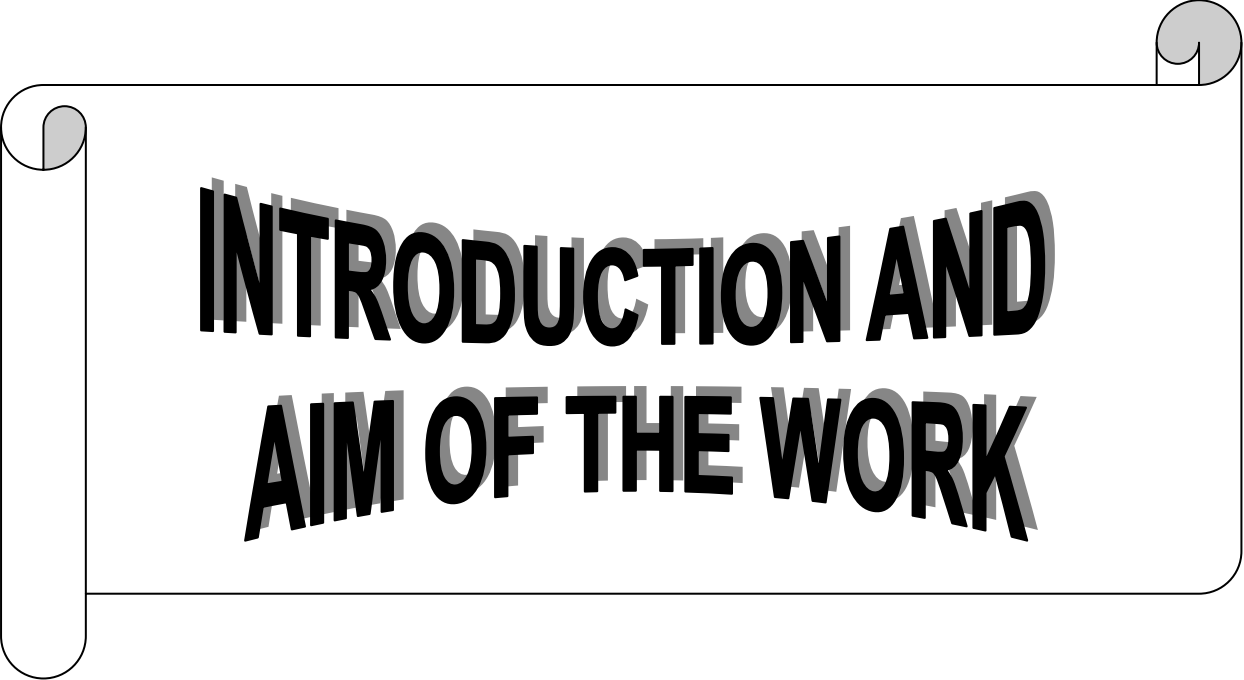

Figure No.	Title	Page No.
1	Division of mediastinum	6
2	Surface projection of the trachea, oesophagus and aorta.	13
3	Superior mediastinum and thoracic inlet.	19
4	Thoracic contents, seen after removal of the anterior thoracic wall.	19
5	Chest x-ray (P.A) and lateral showing thymoma.	10٦
6	Chest x-ray (P.A) showing teratoma.	107
7	Chest x-ray (P.A) and lateral of pericardial cyst	10٨
8	Chest x-ray (P.A) lipoma.	10٩
9	Chest x-ray (P.A) neurogenic tumor.	1١٠
10	CT chest shows mass arising from thymic bed.	115
11	CT chest shows teratoma	116
12	CT chest shows mass in anterior cardiophenic angle (pericardal cyst).	117
13	CT chest shows neurogenic tumor	118

CONTENT

	Page
Introduction	1-3
Aim of the work	4
Chapter one : Anatomy of mediastinum.	5-28
Chapter two Chapter two :Pathology of mediastinal tumours.	29-76
Chapter three: Clinical picture of mediastinal tumours.	77-87
Chapter four: Superior vena cava syndrome.	88-92
Chapter five : Differential diagnosis.	93-99
Chapter six : Investigations of mediastinal tumors.	100-125
Chapter seven : Treatment of mediastinal tumors	126-144
Summary	145-146
References	147-186
Arabic Summary	187-188

ABBREVIATION

AFD	:	Alpha feto protein.
B-HCG	:	β subunit human chronic gandotrophia.
C3b	:	Complement 3 b
CT	:	Computed tomography
ECM	:	Extended cervical mediastinoscopy
Eps	:	Extralobar pulmonary sequestration.
IVC	:	Inferior vena cava.
MGCT	:	Mediastinal geran cell tumours.
MRI	:	Magnetic resonance imaging
NSE	:	Neuro secretory granules.
PNET	:	Peripheral neuroectodermal tumour.
RS cells	:	Reed-starnberg cells.
SCM	:	Standard cervical mediastinoscopy
SVC	:	Superior vena cava syndrome.
VIP	:	Vasoactive intestinal peptide.
VMA	:	Venylmandelic acid.

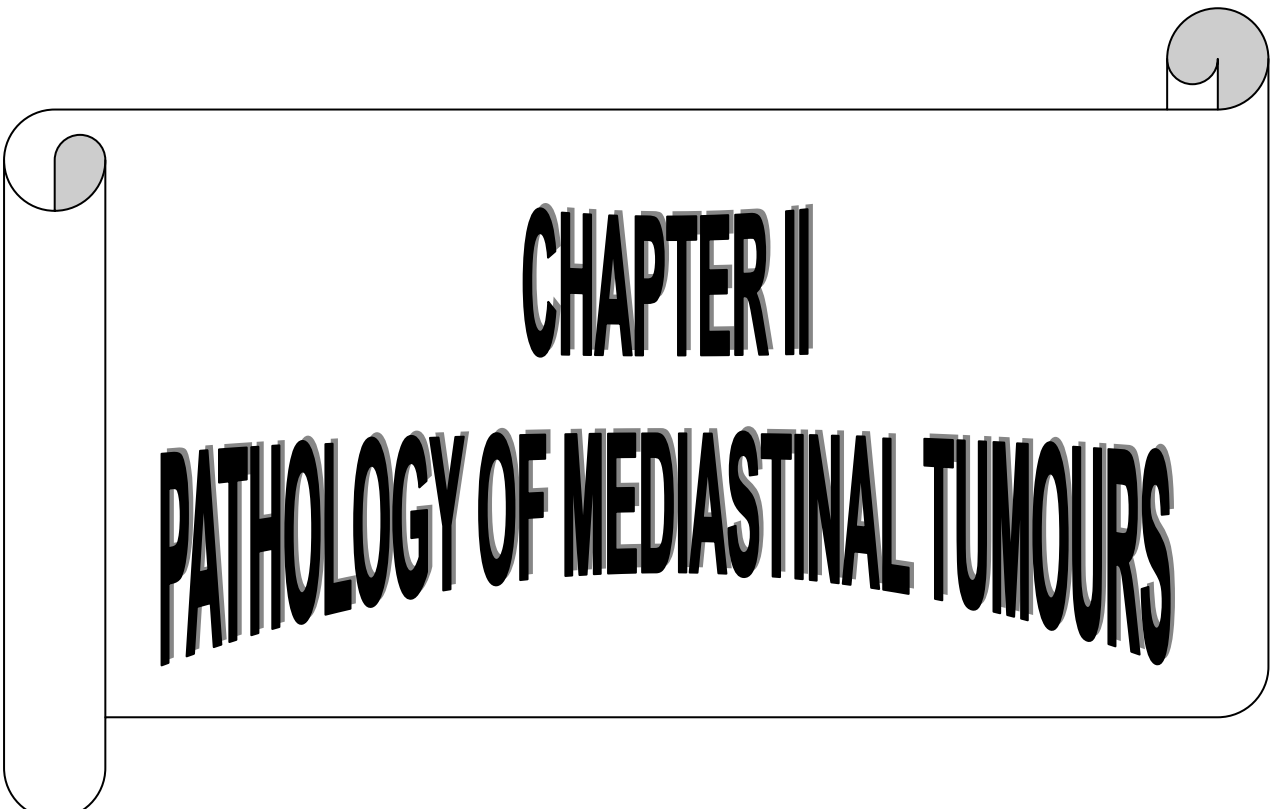

A decorative graphic of a scroll with a black outline and rounded corners. The scroll is partially unrolled, with the top and bottom edges showing a grey inner layer. The text is centered on the white surface of the scroll.

INTRODUCTION AND AIM OF THE WORK

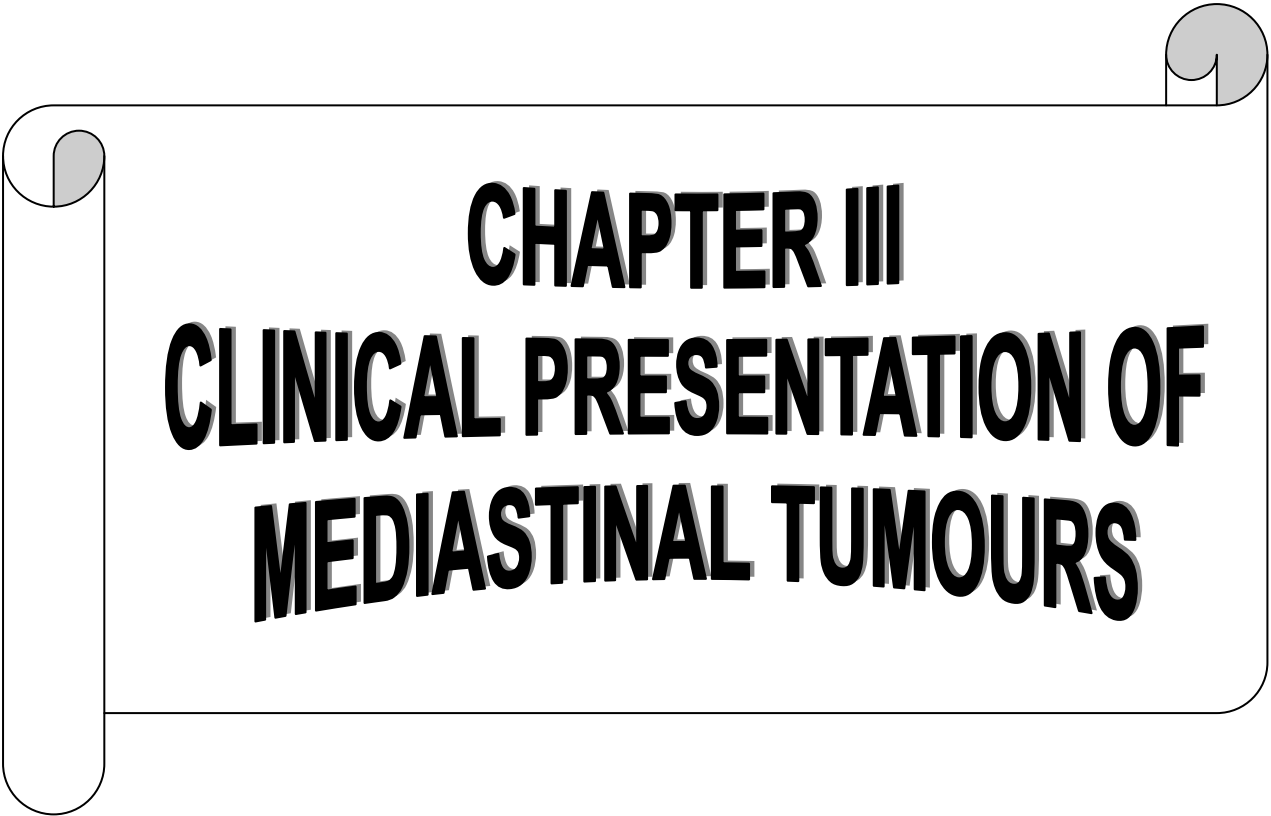

CHAPTER I

ANATOMY OF THE MEDIASTINUM

CHAPTER II

PATHOLOGY OF MEDIASTINAL TUMOURS

A decorative graphic of a scroll with a black outline and grey shading on the rolled-up ends, framing the chapter title.

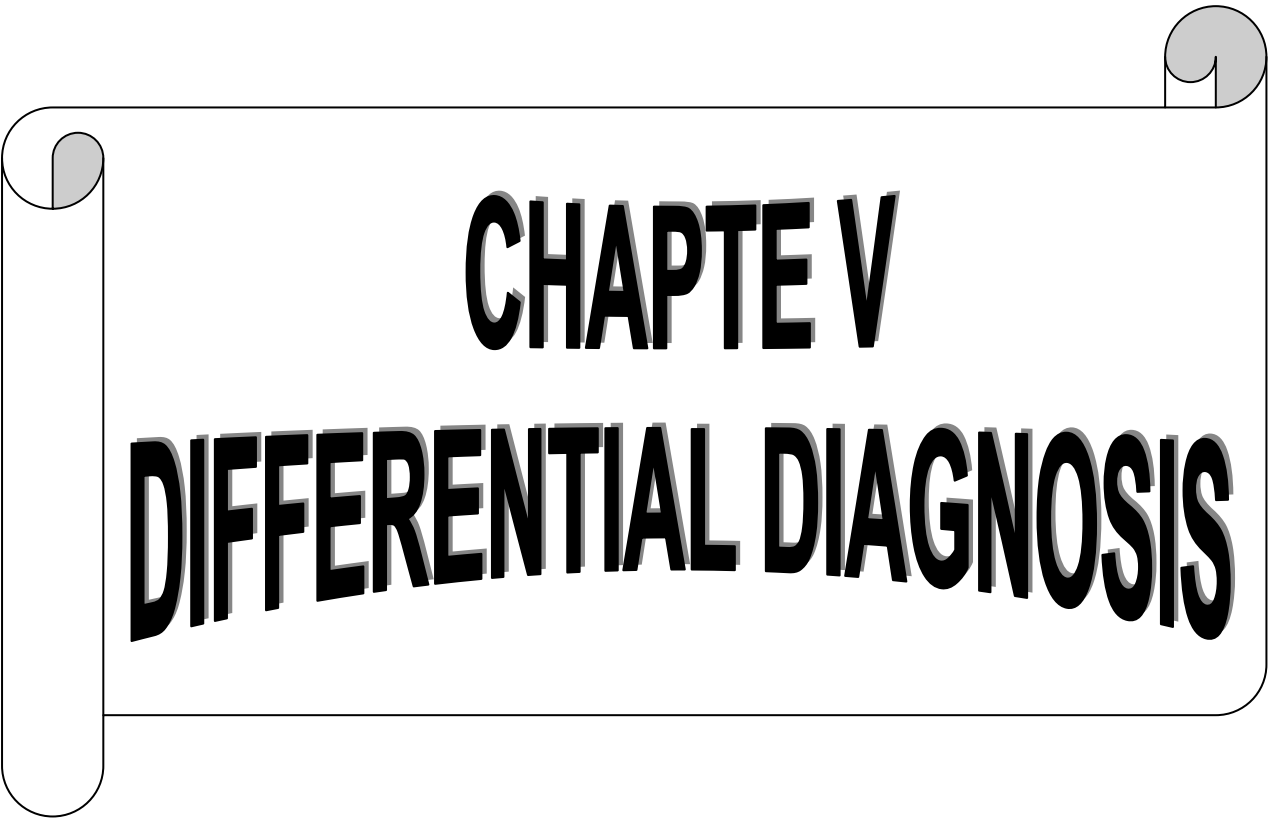

CHAPTER III

CLINICAL PRESENTATION OF MEDIASTINAL TUMOURS

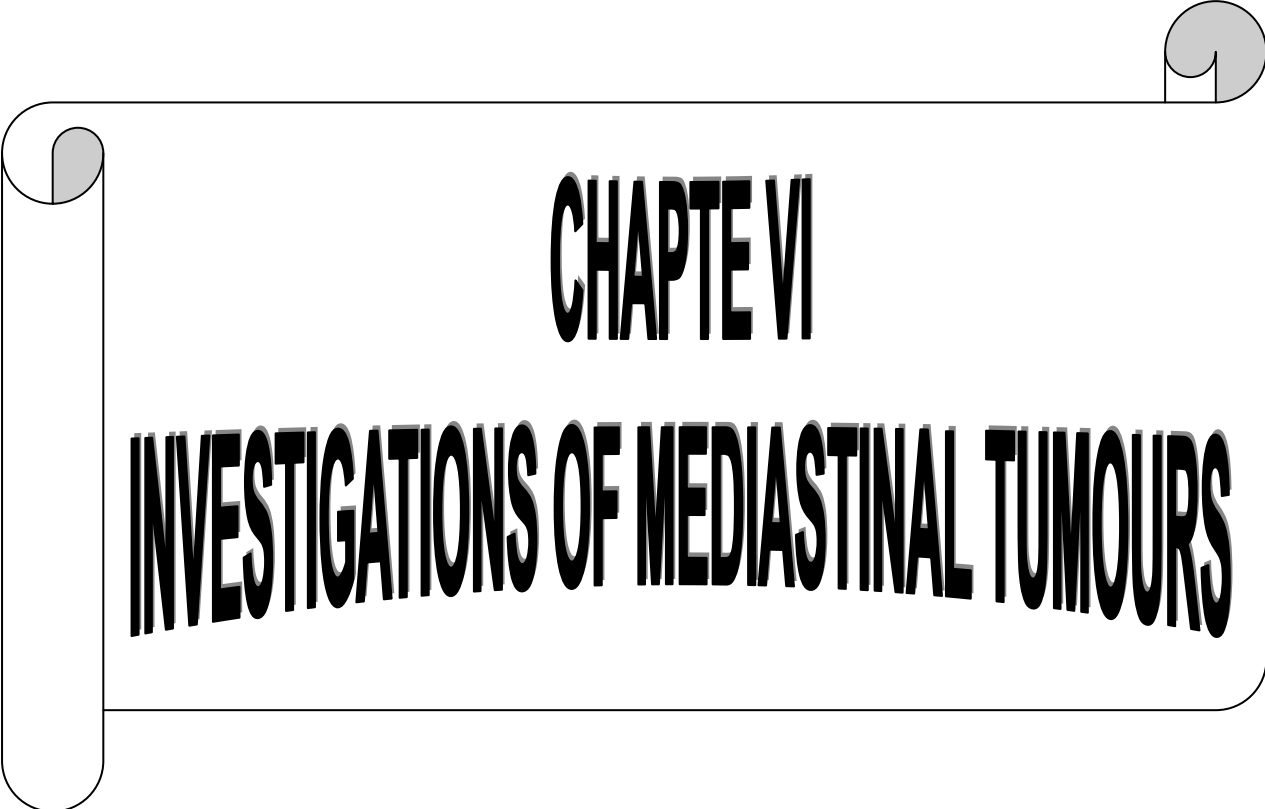

CHAPTE IV

SUPERIOR VENA CAVA SYNDROME

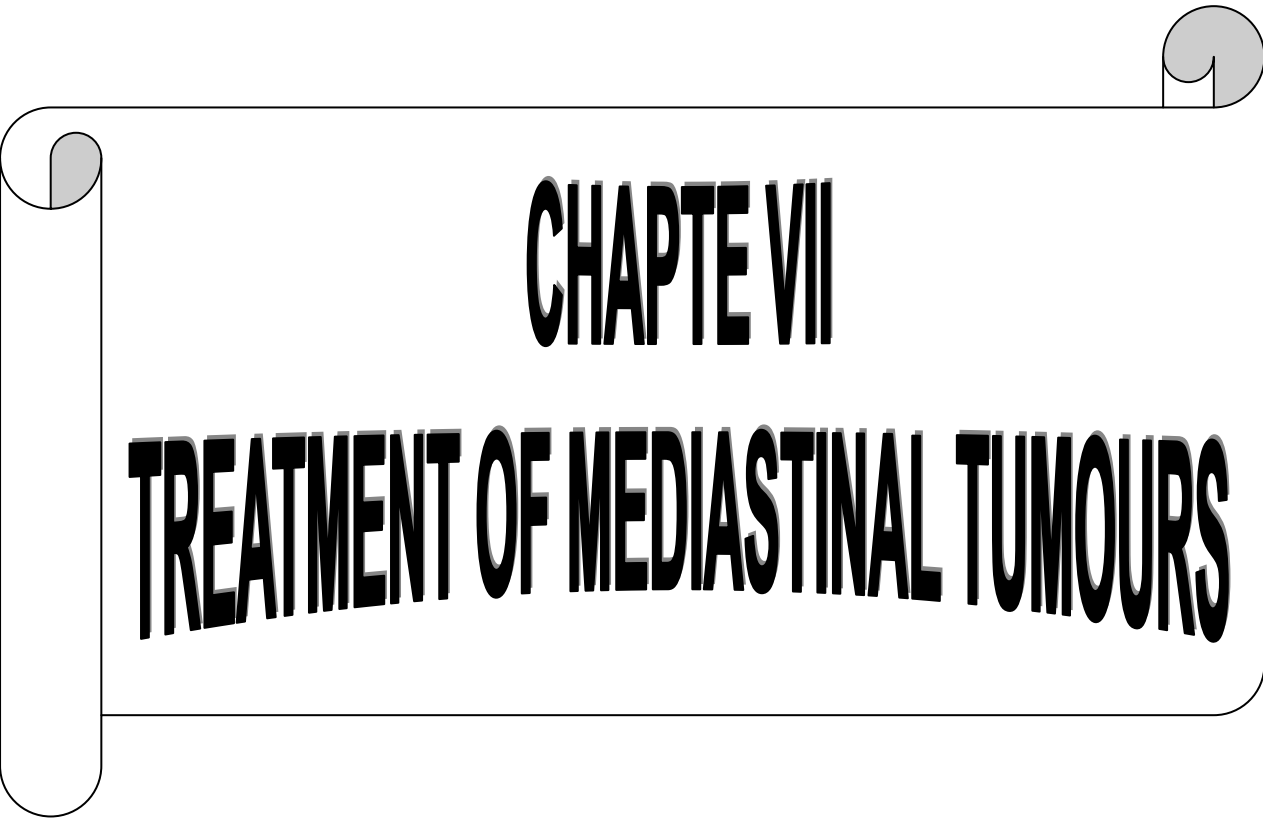

CHAPTE V

DIFFERENTIAL DIAGNOSIS

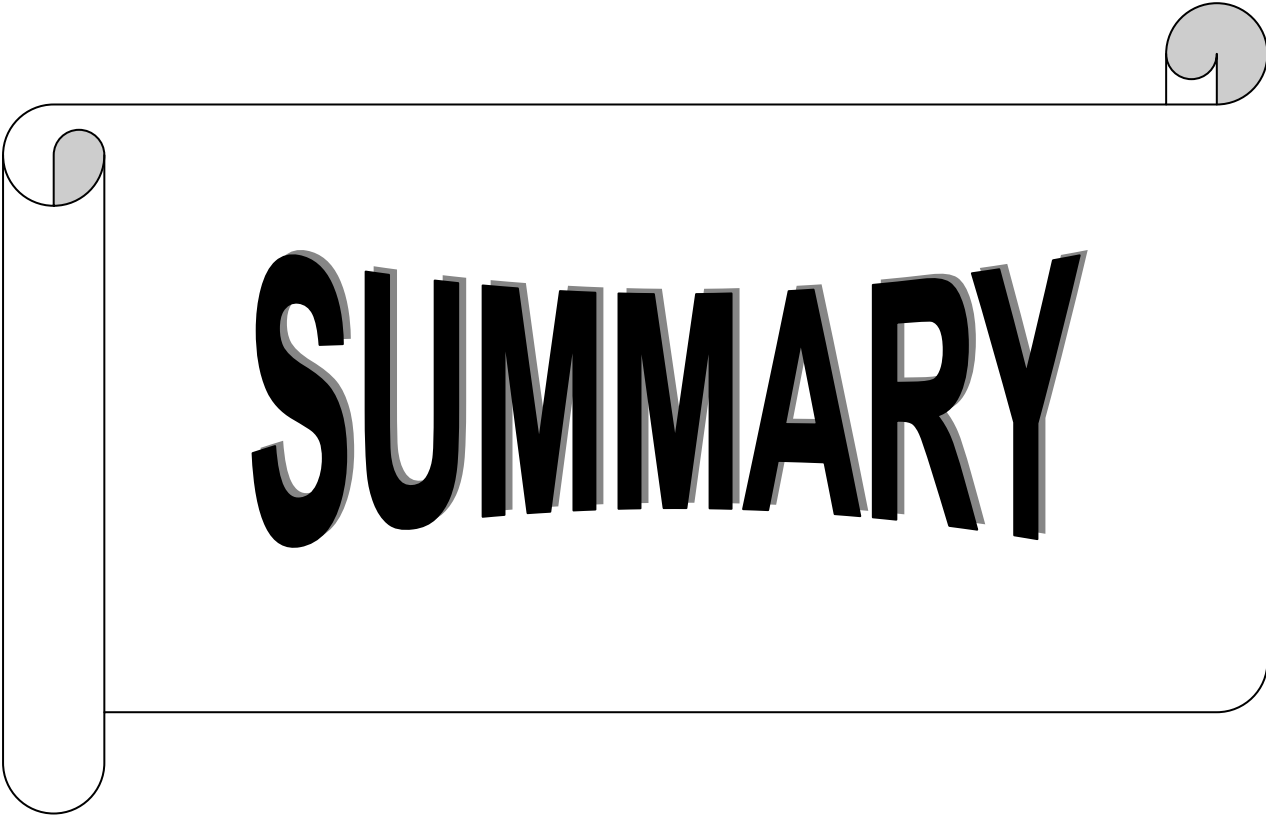

CHAPTE VI

INVESTIGATIONS OF MEDIASTINAL TUMOURS

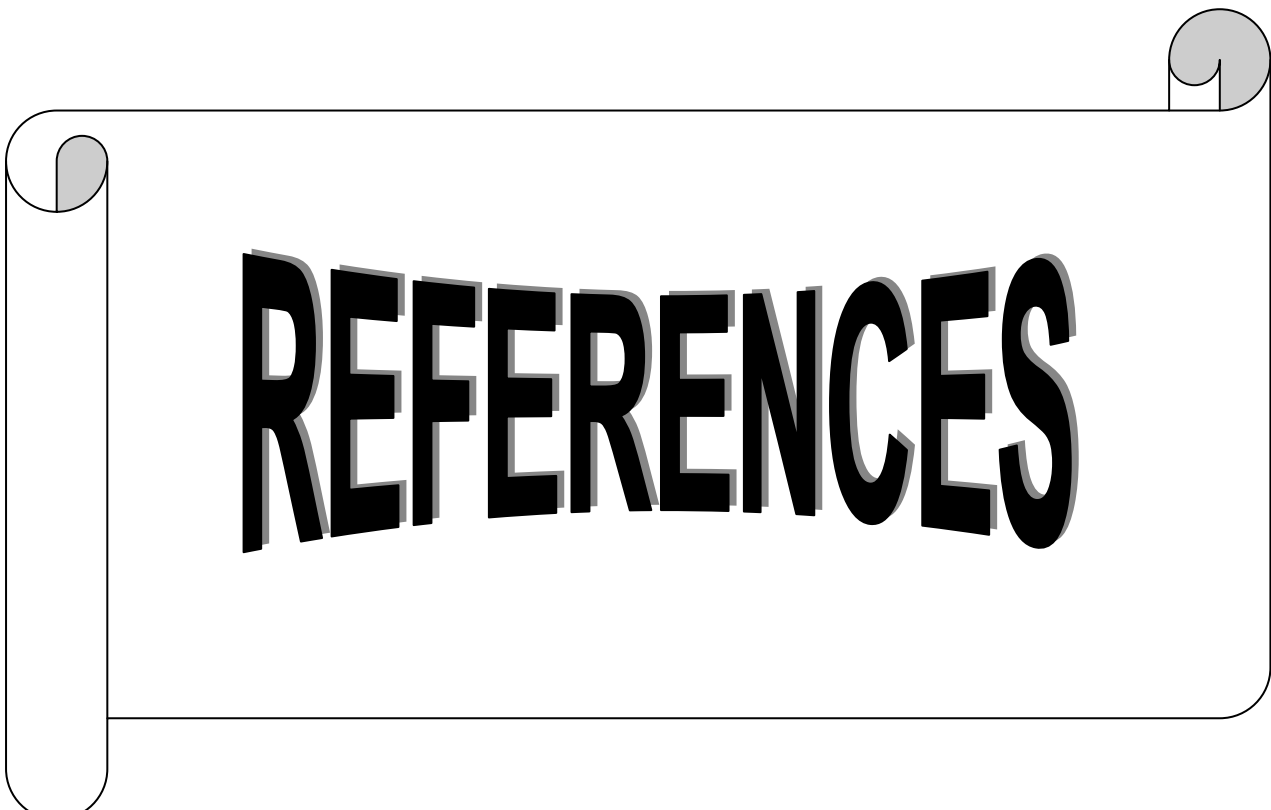

CHAPTE VII

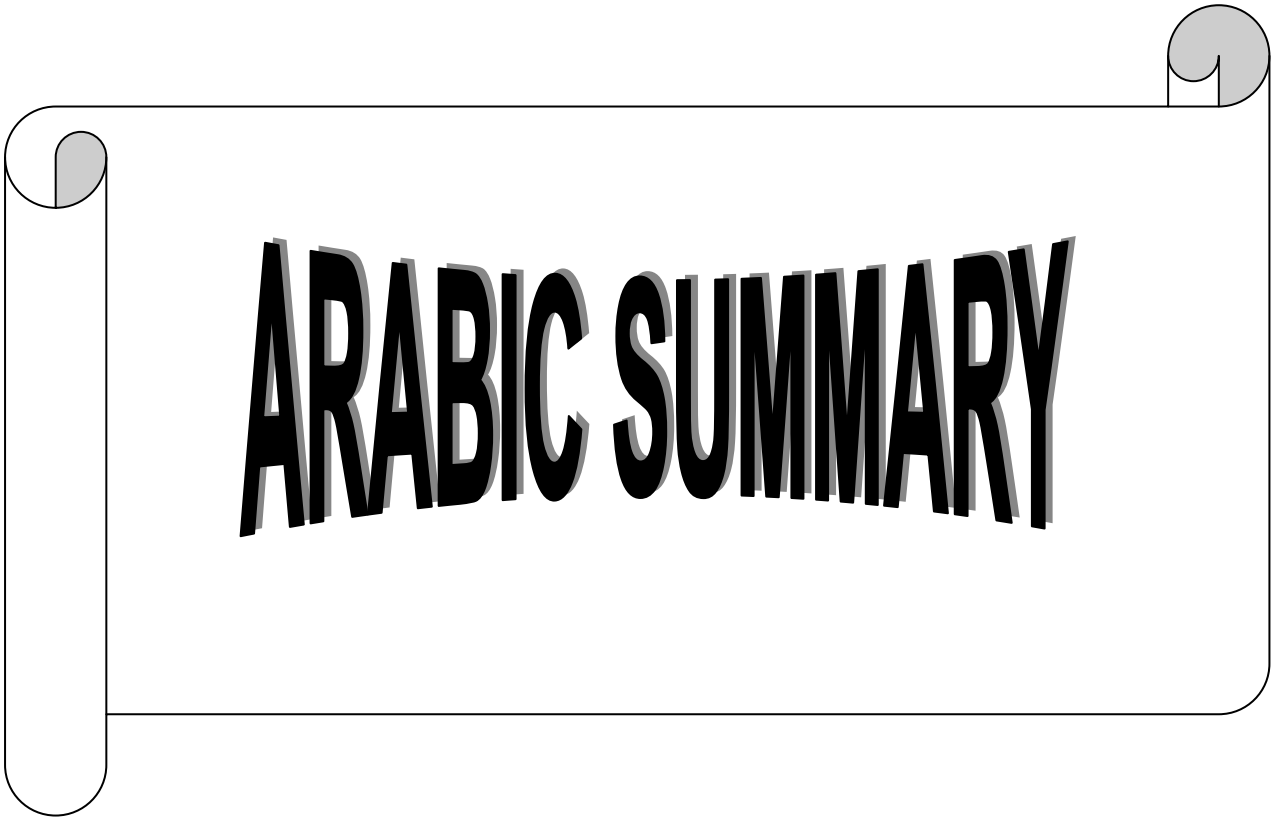

TREATMENT OF MEDIASTINAL TUMOURS
