• Introduction	1
• Aim of the Work	3
• Review of Literature	
Chapter I: Prematurity and low birth weight	4
Chapter II: Cranial ultrasound.....	12
Chapter III: Intracranial Hemorrhage:	31
• Subject and methods	47
• Results	56
• Discussion	86
• Summary and Conclusion.....	99
• Recommendations	104
• Figure of sonography	105
• References	111
• Arabic Summary	

List of Figures

Page	Figure
1	-Anatomy of PIVH30
2	-shows the difference of gestational age between the studied groups 56
3	-shows Sex distribution of studied groups57
4	-shows comparison of weight between the studied groups58
5	-Show significant higher incidence of abnormal cranial ultra sound in group I as compared with those in group II60
6	-Shows the effect effect of the studied perinatal factors on cranial sonographic data62
7	-Shows the effect effect of the studied perinatal factors on cranial sonographic data63
8	-Shows the effect of the gestational age, birth weight and body temperature on cranial sonographic data.....64
9	-Shows the effect of gender, and % of occurrence of SGA on cranial sonographic data.....65
10	- Shows Effect of O2 Duration , RBCS , HB , PLT ,WBCs and IT on cranial sonographic data.....67
11	- shows Effect of CRP , RDS , Sepsis and Level of cons and cranial sonographic data 68
12	- shows the Effect of presence of air leak and seizures on cranial sonographic data69
13	- shows Effect of Muscle tone , Moro, Sucking and Ventilation on cranial sonographic data.....70
14	- Show significant higher incidence of mortality rate and abnormal neurodevelopmental delay in group I as compared

with those in group II.....	71
15 - Show significant higher incidence of mortality rate and abnormal neurodevelopmental delay in abnormal cranial ultra sound as compared with those is normal.....	72
16 - Show significant higher incidence of mortality rate and abnormal neurodevelopmental delay in group I(<1.5) as compared with those in group II(1.5-2.5).....	73
17 -- Shows comparison of Maternal diabetes , Preeclampsia , Ante partum hemorrhage , PROM and Steroid therapy with outcome.....	75
18 - Shows comparison of Mode of Delivery and Presentation with outcome.....	76
19 - Show Distribution of clinical data as compared with outcome.....	78
20 - Show effect of air leak and seizure on outcome.....	78
21 - Show comparison between abnormal cranial ultrasound and outcome.....	80
22 - This table shows Highly significant positive correlation between Denver development screening test and outcome.....	81
23 --This figure shows that significant positive correlation between Gestational age and abnormal cranial ultrasound.....	83
24 - This figure shows that significant positive correlation between abnormal cranial ultrasound and weight.....	83
25 - This figure shows that significant positive correlation between between abnormal cranial ultrasound and air leak.....	84

26 - This figure shows that significant positive correlation between abnormal cranial ultrasound and outcome.....	84
27 - Sagittal view of left old subependymal cyst.....	108
28 - Coronal view of Rt old subependymal hematoma.....	109
29 - Coronal view of LT subependymal hematoma.....	109
30 - Sagittal view of LT subependymal hematoma.....	110
31 - Sagittal view of Lt and Rt subependymal cyst	110
32 - Coronal view of mild symmetrical lateral ventricle dilatation	111
33 - Coronal view of grade III intracranial hge (intraventricular hge) starting liquifaction of choroid he	112
34 -- Coronal view of mild dilatation of both lateral and 3rd ventricles normal sized 4th ventricle picture suggestive of obstruction at the aqueduct level.....	112
35 - Coronal and Sagittal views of periventricular leukomalacia.....	113

LIST OF TABLES

Table	Page
1. Neonatal problems associated with premature infants	10
2. The most common cranial ultrasound abnormalities	19
3. Sonographic finding of agenesis of corpus callosum . . .	25
4. Classification of PIVH... ..	31
5. Modification of Grade Descriptions of Table 3... .	34
6. Apgar scoring system.....	48
7. Sarnat and Sarnat stages of HIE	50
8. Age of which given percent.....	54
9. Comparison between gestational age of the studied neonates	56
10. Sex distribution of the studied neonates	57
11. Comparison of weight among the studied neonates	58
12. Comparison between abnormal sonographic data among the studied neonates	59
13. Effect of Maternal diabetes, PROM, PIH, APH and Steroids on cranial sonographic data	61
14. Effect of presentation and mode of delivery on cranial sonographic data	62
15. Effect of gestational age, birth weight and body temperature on cranial sonographic data	63
16. Effect of gender, and % of occurrence of SGA on cranial sonographic data	64
17. Effect of O ₂ Duration , RBCS , HB , PLT ,WBCs and IT on cranial sonographic data	66

18.Effect of CRP , RDS , Sepsis and Level of cons and cranial sonographic data	67
19.Effect of presence of air leak and seizures on cranial sonographic data	68
20.Effect of Muscle tone , Moro, Sucking and Ventilation on cranial sonographic data	69
21.Distribution of outcome in the studied preterm newborn.....	70
22.Effect of abnormal sonographic data on Outcome.	71
23.Effect of the birth weights on the outcome	72
24.Effect of Maternal diabetes, PROM, PIH, APH and Steroids on Outcome	74
25.Effect of presentation and mode of delivery on Outcome	75
26.Effect of CRP , RDS , Sepsis, air leak and seizure on Outcome	77
27.Effect of abnormal sonographic finding on outcome among the studied newborn.....	79
28.Correlation between Gestational age, Weight, DDST and Outcome.....	81
29.Correlation between abnormal cranial ultrasound and other data.....	82

LIST OF ABBREVIATIONS

APH	:	Ante partum hemorrhage
CNS	:	Central nervous system
CP	:	Clinical presentation
CRP	:	C reactive protein
CS	:	Caesarean section
CSF	:	Cerebrospinal fluid
CT	:	Computed tomography
DIC	:	Disseminated intravascular coagulation
HB	:	Hemoglobin
HC	:	Hydrocephalus
HGE	:	Hemorrhage
ICH	:	Intracranial hemorrhage
GM-IVH	:	Germanial Matrix-Intraventricular hemorrhage
MND	:	major neuro developmental delay
PIH	:	Preeclampsia
PROM	:	Premature Rupture of membrane
RBCS	:	Red blood cells
RDS	:	Respiratory Distress Syndrome
SDH	:	Subdural hemorrhage
TCD	:	Transcranial color Doppler ultrasonography
CUS	:	Cranial Ultrasound
