

LIST OF CONTENTS

Subject	Page
Aim of the Work	
Anatomy of the Macula	
- Macroscopic anatomy	1
- Microscopic anatomy	3
- Blood supply of the macula	6
- Blood-retinal barrier.....	7
- Structures of the blood-ocular barriers.....	9
Epidemiology of DME	
- Epidemiology of DME	11
- Risk factors of DME	12
- Hyperglycemia	12
- Genetic factors.....	13
- Types, duration of diabetes	14
- Systemic factors.....	14
- Ocular factors	16
Pathogenesis and pathophysiology of DME	
- Role of angiogenic factors	22
- Role of PKC- β pathway	25
- Role of sorbital accumulation	27
- Role of AGEs	29
- Role of Oxidative stress	30
- Role of erythropoiten	31
- The breakdown of BRB and its effect	32
- The consequences of BRB breakdown	33
Diabetic macular edema	
- Classification of DME	32
- Types of Diabetic macular edema.....	33
- Focal macular edema.....	33
- Diffuse macular edema	34
- Ischemic maculopathy	36
- Mixed type maculopathy	37

Diagnosis of DME

-Detection of DME	39
- Investigations of DME	43
- Fundus fluorescein angiography	45
- Optical coherence tomography	50
- Retinal thickness analyzer	59

Management of diabetic macular edema

- Prevention of DME	63
- Treatment of DME	63
- Laser photocoagulation	64
- Vitrectomy	71

Intravitreal Drugs For Diabetic Macular Edema

- Intravitreal triamcinolone injection (IVTA)	80
- Other steroids used in treatment of DME	91
- Intra vitreal prednisolone	92
- Vascular endothelial growth factors inhibitors (anti VEGF)	94
- Aptamers	95
- Bevacizumab	95
- Ranibizumab.....	99
- Combination therapy of the IVTA plus sequential grid laser.....	102

Summary.....	107
