

TABLE OF CONTENTS

Introduction and Aim of the Work	1
Review of Literature:	
□ Anatomy of the normal renal transplant.	5
□ Complications of Renal Transplantation.	7
□ Role of Different Imaging modalities used in evaluation of renal allograft complications:	19
1. <i>Color Duplex Ultrasonography.</i>	21
2. <i>Radionuclide evaluation of renal allograft.</i>	53
3. <i>Role of Angiography in diagnosis.</i>	76
4. <i>Role of CT.</i>	81
5. <i>Role of MRI.</i>	84
6. <i>Needle biopsy.</i>	87
□ Interventional Procedures	91
Patients and Methods	101
Results	105
Case Presentations	139
Discussion	181
Summary and Conclusions	201
References	205
Arabic Summary	243
