<u>LIST OF TABLES AND FIGURES</u>	iv
A. Tables	
B. Figures	
<u>ACKNOWLEDGEMENTS</u>	vi
<u>LIST OF ABBREVIATIONS AND TRIVIAL NAMES</u>	viii
<u>SUMMARY</u>	1
<u>INTRODUCTION</u>	3
<u>MATERIALS AND METHODS</u>	
<u>MATERIALS</u>	19
1. Chemicals	19
a) Chemicals used in culture	19
b) Chemicals used in morphological studies	20
c) Chemicals used in biochemical studies	21
2. Animals	22
<u>METHODS</u>	24
1. Preparation of materials	24
a) Glassware	24
b) Coverslips	24
c) Sterilisation	24
i) Dry heat	24
ii) Moist heat	25
iii) Filtration	25
2. Preparation of culture media	25
3. Tissue culture technique	26
a) Effect of different culture media	29
b) Effect of foetal calf serum	29
c) Effect of medium exchange	29
d) Effect of insulin, hydrocortisone and collagenase	29
e) Effect of trypsin	30
f) Effect of two weeks culture	30
4. Absorption of cationized ferritin	31

	Page
5. Effect of tripotassium dicitrato-bismuthate	32
6. Preparation of tissue for morphological studies	33
a) Light microscopy	33
i) Haematoxlin and eosin	33
ii) Alcian blue pH 2.5	34
iii) High iron diamine	35
iv) Periodic acid-Schiff (PAS)	35
b) Transmission electron microscopy	37
c) Scanning electron microscopy	38
7. Enzyme studies	39
a) Enzyme assays	40
i) β -glucuronidase	40
ii) Alkaline phosphatase	40
iii) Acid phosphatase	41
iv) Monoamine oxidase	41
b) Precision	43
8. Protein assay	43
9. DNA assay	43
10. DNA and protein synthesis	44
a) DNA synthesis	44
b) Protein synthesis	45
11. Radioactivity determination	45
12. Effect of bile	46
13. Human gallbladder	46
a) Culture	46
b) Absorption of cationized ferritin	47
<u>RESULTS</u>	48
1. Effect of different culture media	48
a) Light microscopy	48
b) Transmission electron microscopy	66
c) Scanning electron microscopy	86
2. Effect of foetal calf serum	86

	Page
3. Effect of medium exchange	92
4. Effect of insulin, hydrocortisone, collagenase and trypsin	92
5. Absorption of cationized ferritin	92
6. Effect of tripotassium dicitrato-bismuthate	104
7. Enzyme studies	110
a) Enzyme activities	110
i) Alkaline phosphatase	110
ii) Acid phosphatase	111
iii) β -glucuronidase	111
iv) Monoamine oxidase	111
b) Precision	111
8. DNA assay	116
9. DNA synthesis	116
10. Protein synthesis	116
11. Effect of bile	116
12. Human gallbladder	119
a) Culture	119
b) Absorption of cationized ferritin	119
<u>DISCUSSION</u>	137
