List of Abbreviations.....	i
List of Tables.....	vii
List of Figures.....	viii
Preface.....	ix
Chapter 1: A Survey on Multiobjective Optimization.....	1
1.1 Introduction.....	1
1.2 Basic Concepts.....	3
1.2.1 Main Terminology and Notations.....	3
1.2.2 The Solution Process and Its Elements.....	4
1.3 Noninteractive Approaches.....	6
1.3.1 Basic Methods.....	6
1.3.1.1 Weighting Method.....	7
1.3.1.2 ε -Constraint Method.....	9
1.3.2 No-Preference Methods.....	10
1.3.2.1 Method of Global Criterion.....	10
1.3.2.2 Neutral Compromise Solution.....	11
1.3.3 A Posteriori Methods.....	12
1.3.3.1 Method of Weighted Metrics.....	13
1.3.3.2 Achievement Scalarizing Function Approach.....	14
1.3.4 A Priori Methods.....	14
1.3.4.1 Value Function Method.....	15
1.3.4.2 Lexicographic Ordering.....	16
1.3.4.3 Goal Programming.....	16

1.3.5	Comparing the Noninteractive Methods.....	18
1.4	Interactive Approaches.....	18
1.4.1	Trade-off Based Methods.....	21
1.4.1.1	Different Trade-off Concepts.....	21
1.4.1.2	The Use of Trade-offs within Interactive Methods and Some Trade-off Based Methods.....	22
1.4.2	Reference Point Approaches.....	24
1.4.2.1	Fundamental Assumptions of Reference Point Approaches.....	24
1.4.2.2	Basic Features of Reference Point Approaches and Some of Their Variants.....	26
1.4.3	Classification-Based Methods.....	27
1.4.3.1	Introduction to Classification of Objective Functions.....	27
1.4.3.2	Some Classification-Based Methods.....	29
1.4.4	General Discussion about Interactive Methods	32
1.5	Evolutionary Multiobjective Optimization.....	32
1.5.1	Evolutionary Optimization.....	34
1.5.2	EMO Principles.....	38
Chapter 2:	A Survey on Artificial Intelligence Tools.....	41
2.1	Introduction.....	41
2.2	Particle Swarm Optimization.....	44
2.3	Particle Swarm Optimization for Multiobjective Problems.....	47
2.3.1	Selecting Leaders in Multiobjective Optimization.....	51
2.3.2	Retaining and Spreading Nondominated Solutions.....	53
2.3.3	Promoting Diversity while Creating New Solutions.....	56
2.4	The Taxonomy of MOPSO Approaches.....	58
2.5	Particle Swarm Optimization Advantages.....	62

2.6	Artificial Neural Networks.....	64
2.6.1	Neural Networks from the Biological Perspective.....	64
2.6.2	Artificial Neuron.....	65
2.6.3	Network Architectures.....	65
2.6.4	ANN Learning.....	67
2.6.5	Applications of ANNs.....	68
2.7	ANNs and Multiobjective Optimization.....	68
2.7.1	Objective Functions Approximation.....	69
2.7.2	Inverse Modeling.....	69
2.7.3	Multiple Criteria Decision Making.....	69

Chapter 3: An Adaptive Intelligent Method for Solving Multiobjective Optimization Problems.....72

3.1	Introduction.....	72
3.2	Multiobjective Optimization Problem.....	75
3.2.1	Problem Formulation.....	75
3.2.2	Augmented Weighted Tchebycheff Problems.....	76
3.2.3	Value Function.....	77
3.3	Decision Maker's Preference Structure Model.....	79
3.3.1	Model Parameter Vector.....	79
3.3.2	General Multiobjective Optimization Procedure.....	79
3.3.3	DM's Preference Structure Model.....	80
3.3.4	Preference Information Elicitation.....	82
3.4	The Solution Procedure of Multiobjective Optimization Adaptive Intelligent Method.....	83
3.5	Illustrative Examples.....	86
3.5.1	Example 1.....	87
3.5.2	Example 2.....	88
3.5.3	General Discussions.....	90

3.6	MOAIM versus IIMOM.....	91
Chapter 4: Design of an Inset-Fed Rectangular Microstrip Patch Antenna Using MOAIM.....98		
4.1	Introduction.....	98
4.2	Microstrip Antenna.....	99
4.3	Rectangular Microstrip Antenna.....	100
4.3.1	Microstrip Line Feed.....	101
4.3.2	Transmission Line Model.....	102
4.3.2.1	Fringing Effects.....	102
4.3.2.2	Resonant Input Resistance.....	104
4.3.2.3	Inset Feed.....	105
4.4	Problem Formulation.....	106
4.4.1	Mapping Weight Vector to Preference Value.....	107
4.5	Results.....	108
Chapter 5: Conclusion and Future Scope.....110		
5.1	Conclusion.....	110
5.2	Future Work.....	111
Bibliography.....		113
