

TABLE OF CONTENTS

INTRODUCTION	1
AIM OF THE WORK	4
REVIEW OF LITERATURE	5
Chapter (1): Terminology, diagnosis and classification of proliferative vitreoretinopathy	4
- Definition, Terminology of PVR	4
- Epidemiology of PVR	6
- Diagnosis and classification of PVR	8
- Different classifications of PVR	16
- Methods of grading of PVR	25
Chapter (2): Pathogenesis of proliferative vitreoretinopathy	27
- Vitreoretinal scarring stages.	27
I. Cellular origin of PVR	27
II. Stage of cell differentiation (metaplasia or transformation) and proliferation	33
III. Extracellular matrix elaboration and remodeling	34
IV. Membrane contraction.	39
- Role of various growth factors in PVR	42
- Role of retinoic acid as growth inhibitor and effect of retinal detachment	50
- The PVR pathway and autocrine loops	51
Chapter(3): Risk factors for development of proliferative vitreoretinopathy	55
- Clinical risk factors	55
- Surgical (intraoperative) risk factors of postoperative PVR	62
Chapter(4): Management	64
- Surgery	65
- Surgical adjuncts	75
- General considerations and criteria of drug selection	76

PATIENTS AND METHODS	86
- Patient selection	86
- Preoperative assessment and preparation	88
- Surgical technique	100
- Postoperative management	105
RESULTS	135
DISCUSSION	146
SUMMARY AND CONCLUSION	149
REFERENCES	177
ARABIC SUMMARY	

LIST OF FIGURES

Fig.1-1	Proliferative vitreoretinopathy grade A	9
Fig.1-2	Folding of the retina as a result of epiretinal membranes	10
Fig.1-3	Stardfold of PVR	12
Fig.1-4	Subretinal PVR	13
Fig.1-5	Anterior PVR	15
Fig.1-6	Sagittal B-scan ultrasound showing total retinal detachment with advanced PVR	16
Fig.1-7	PVR grading	19
Fig.1-8	Subretinal proliferations	23
Fig.1-9	Grading of PVR	26
Fig.2-1	Vitreous aspirate of patient with giant tear	29
Fig.2-2	Modiied Boyden chamber	29
Fig.2-3	The effect of gravity on retinal pigment epithelial cells	31
Fig.2-4	Interaction between fibronectin, extracellular matrix components, and retinal pigment epithelial cells	37
Fig.2-5	Effects of cels cultured in a three – dimensional lattice after 24 hours	41
Fig.2-6	Cinemicrographic studies for RPE cellsi n culture	41
Fig.2-7	The PVR pathway	54
Fig.3-1	Effect of cryotherapy on the release of viable RPE cells	95
Fig.4-1	The use of circumfrential buckle to relieve traction on the vitreous base	67
Fig.4-2	Removal of epiretinal membrane	68
Fig.4-3	Removalof subretinal membrane	68
Fig.4-4	Relaxing retinotomy in PVR	70
Fig.4-5	The moecular structure of the most commonly used silicone oil	71
Fig.4-6	Biochemical pathways of fluoropyrimidine activation	80

Fig4-7	Mechanisms of action of antiproliferative drugs	
Fig.5-1	BIOM visualization system attached to operating microscope	90
Fig.5-2	Low molecular weight heparin and 5-fluorouracil traec forms	92
Fig.5-3	Vitrectomy machine used in the study	93
Fig.5-4	End – gipping vitrectomy forceps, membrane spatula and vitrectomy set	95
Fig.5-5	Endolaser machine	97
Fig.5-6	Technique of silicone oil injection as described by Peymen	98
Fig.6-1	Aphakic retinal detachment attached under silicone	129
Fig.6-2	Case showing recurrence after silicone oil removal in group B with laser marks extending centrally	129
Fig.6-3	Postoperative case with preoperative mild vitreous hemorrhage showing attached retina with cataractous lens.	130
Fig.6-4	Case of phacovitrectomy showing pigmented membrane at upper arcade under silicone	130
Fig.6-5	Silicone cataract after two procedures	131
Fig.6-6	Case of recurrent traumatic PVR, showing epiretinal membrane at macula with tractional RD	131
Fig.6-7	Case that needed inferior retinectomy for recurrent after vitrectomy, showing attachment under silicone	132
Fig.6-8	One eyed patient showing attached retina with pale disc and glaucomatous changes.	132
Fig.6-9	Case of pseudophakic RD showing final attachment under silicone	133
Fig.6-10	Case of phacovitrectomy showing dense PCO that resisted YAG capsulotomy with difficult evaluation of retinal condition	133
Fig.6-11	Pre – and postoperative images for pseudophakic detachment case in group B	134

LIST OF TABLES

Table 1-1	Original Retina Society Classification of PVR	18
Table 1-2	Updated Etina Society PVR Classification by Grade	24
Table 1-3	Updated Retina Society PVR Classificatonby Contraction Type	25
Table2-1	Growth factors / cytokines in PVR	42
Table 6-1	Age distribution of group A and group B	105
Table 6-2	Sex distribuion in group A and B	106
Table 6-3	Laterality in group A and group B	107
Table 6-4	History of myopia in group A and group B	107
Table 6-5	Lens status in group A and group B	108
Table 6-6	Risk factors of postoperative PVR in group A and group B	109
Table 6-7	Detachment characteristics in group A and group B	111
Table 6-8	History of previous operations in group A and group B	112
Table 6-9	Preoperative IOP values in group Aand B	113
Table 6-10	Preoperative visual acuity in group A and group B	114
Table 6-11	Comparison between pregreative visual acuity in group A and group B	115
Table 6-12	Postoperative IOP values in group A	116
Table 6-13	Postoperative IOP values in group B	117
Table 6-14	IOP comparsion of group A and group B	118
Table 6-15	Visual acuity changes in group A	119
Table 6-16	Visual acuity changes in group B	120
Table 6-17	Comparison between visual acuity changes of group A and group B	121
Table 6-18	Comparison between group A and group B as regards primary outcome measure	122
Table 6-19	Comparison between group A and group B as regards retina study at 6 months	123
Table 6-20	Comparison between group A and group B as regards post operative proliferation	124
Table 6-21	Late postoperative complications in both groups	125

LIST OF CHART

Chart 6-1	Sex distribution in group A and group B	106
Chart 6-2	Laterality in group A and group B	107
Chart 6-3	High myopia and trauma in group A and group B	108
Chart 6-4	Lens status in group A and group B	109
Chart 6-5	History of previous operations in group A and group B	113
Chart 6-6	Mean preoperative IOP in group A and group B	114
Chart 6-7	Preoperative visual acuity in group A and group B	116
Chart 6-8	Mean postoperative IOP in group A and group B	119
Chart 6-9	Postoperative visual acuity changes in group A and group B	122
Chart 6-10	Primary outcome measure in group A and group B	123
Chart 6-11	Retina status at 6 month in group A and group B	125
Chart 6-12	Postoperative proliferation in group A and group B	126
Chart 6-13	Late postoperative complications in group A and group B	128
