Aim of work	
Summary	
CHAPTER 1	
1-Introduction	1
<i>1.1- Structure and Chemistry of 1,3,4-Thiadiazoles</i>	<i>1</i>
<i>1.2- Synthesis of 1,3,4-Tbiadiazoles</i>	<i>1</i>
<i>1.2.1- From Acid Hydrazide</i>	<i>1</i>
<i>1.2.2- from Benzimidazole</i>	<i>2</i>
<i>1.2.3- Synthesis of Thiadiazoles by Oxidation of Fully or Partially Reduced Derivatives</i>	<i>3</i>
<i>1.2.4. Synthesis of Thiadiazoles by Transformation of Other Heterocycles</i>	<i>4</i>
<i>1.2.4.1- From 1,3,4-Oxadiazoles</i>	<i>4</i>
<i>1.2.4.2- From 1,2,3-Dithiazoles</i>	<i>5</i>
<i>1.2.5- Ring Synthesis from Acyclic Compounds Classified by Number of Ring Atoms Contributed by Each Component</i>	<i>8</i>
1.2.5.1- Formation of One Bond	8

<i>1.2.5.2- Formation of Two Bonds</i>	<i>9</i>
<i>1.3- Thermodynamic Aspects</i>	<i>11</i>
<i>1.3.1- Physical Properties</i>	<i>11</i>
<i>1.3.2- Aromaticity</i>	<i>12</i>
<i>1.4- Reactivity of Fully Conjugated Rings</i>	<i>13</i>
<i>1.4.1- Survey of Reactivity</i>	<i>13</i>
<i>1.4.2- Unimolecular Thermal and Photochemical reaction</i>	<i>13</i>
<i>1.4.3- Electrophilic Attack at Nitrogen</i>	<i>14</i>
<i>1.4.4- Electrophilic Attack at Carbon</i>	<i>14</i>
<i>1.4.5- Nucleophilic Attack on Carbon</i>	<i>15</i>
<i>1.4.6. Nucleophilic Attack at Hydrogen Attached to Carbon</i>	<i>19</i>
<i>1.5. Important Compounds and Applications</i>	<i>19</i>
CHAPTER 2	
2-Results And Discussion	23
CHAPTER 3	
3-Experimental	31

CHAPTER 4

4-Biological Activity	44
5-References	48
6-Aabic Summary
