## Table of Contents

| Item   | Page No |
|--|---------|
| Introduction   | 1       |
| Aim of the Work  | 2       |
| Anatomy  | 3       |
| Physiology of spinal cord circulation                      | 21      |
| Patho-physiology of spinal cord injury                     | 23      |
| Biochemical configuration of traumatic Spinal cord hypoxia | 43      |
| Biomechanics of the Spine                                  | 45      |
| Imaging of the Spine                                       | 59      |
| Clinical evaluation of different vertebral fractures       | 101     |
| Clinical Presentation                                      | 125     |
| Complications  | 146     |
| Management   | 153     |
| Stem cells   | 216     |
| Rehabilitation   | 242     |
| References   | 258     |
| summary  | 255     |
