Chapter	page
●Introduction.....	1
●Aim of the study.....	4
●Review of literature:	
●Physiology of Phosphorus, Calcium and PTH.....	5
Physiology of Phosphorus	5
Physiology of Calcium	18
Physiology of Parathyroid hormone.....	22
● Hyperphosphatemia and its causes.....	29
●Hyperphosphatemia in Renal Failure.....	40
In Chronic Kidney Disease.....	40
In Acute Renal Failure.....	42
In Chronic Renal Failure.....	42
In Kidney Transplant Patients.....	45
●Clinical Implications of Hyperphosphatemia.....	47
Extraskelatal calcifications in uremia.....	50
EBCT scanning.....	52
Calciphylaxis.....	54
●Prevention and Treatment of Hyperphosphatemia...	60
Dietary restriction.....	62
Prevention and Treatment of hyperparathyroidism...	65
Vitamin D analogs.....	65
Calcimimetics.....	69
Hemodialysis	75
peritoneal dialysis.....	84
Phosphate binders.....	85

Aluminum-based.....	85
Calcium-based.....	85
Non-aluminum, non-calcium phosphate binders...	89
Sevelamer hydrochloride.....	90
Lanthanum carbonate.....	92
Barriers to success.....	96
•Subjects and methods.....	100
•Results.....	103
•Discussion.....	129
• Summary and Conclusion.....	139
•References.....	141
•Arabic summary
