

CONTENTS

INTRODUCTION.....	1
REVIEW OF LITERATURE.....	3
1. The legume- Rhizobia Relationship- a Sustainable Nitrogen Alternative.....	3
1.1. Implications of Irrational Use of Chemical N-Fertilizers.....	3
1.2. Biological Nitrogen Fixation.....	4
1.2.1. Legumes Nitrogen-Fixation Symbiosis.....	5
2. Potentiality of Rhizobia, In Addition to N ₂ Fixation Activity.....	7
2.1. Potential of Rhizobia as Plant Growth-Promoting Rhizobacteria, PGPR.....	7
2.2. Rhizobia as Plant Growth Regulators Producers.....	7
2.3. Rhizobia as Phosphorus Solubilizing Bacteria.....	7
2.4. Rhizobia as Bio-control Agents of Plant Pathogens.....	8
3. Rhizobial Taxonomy.....	8
3.1. History of Rhizobial Taxonomy.....	8
3.2. Present Status of Rhizobial Taxonomy.....	9
4. Peanut Rhizobial Symbiosis.....	10
4.1. Peanut as a Leguminous Crop.....	10
4.2. Peanut Nodulating Rhizobia.....	12
5. Peanut Diseases.....	13
6. Control of Peanut Fungal Diseases.....	15
6.1. Chemical Control of Peanut Fungal Diseases	15
6.2. Biological Control of Peanut Fungal Diseases	15
6.2.1. Rhizobacteria as Bio-control Agents Against Fungal Diseases.....	17
7. Antibiotics as Bacterial Genetic Markers.....	20
8. Horizontal Gene Transfer.....	21
8.1. Bacterial Conjugation.....	22
8.1.1. Antimicrobial Delivered By Bacterial Conjugation.....	23
8.1.2. Conjugation Between <i>Rhizobium</i> and Some of Rhizobacteria.....	24
9. One-dimensional Protein Electrophoresis.....	26
MATERIALS AND METHODS.....	28
I. MATERIALS.....	28
1. Bacterial Strains/ Isolates.....	28
2. Pathogenic Fungi.....	29

3.	Antibiotics Used in This Study.....	29
4.	Culture Media.....	30
4.1.	Yeast Extract Mannitol medium.....	30
4.2.	Peptone Glycerol medium.....	30
4.3.	Kings B medium	30
4.4.	Potato Dextrose Agar.....	31
5.	SDS-Polyacrylamide Gel Solutions.....	31
6.	Cultivars Seeds.....	33
7.	Soils Used in This Study.....	34
II.	METHODS	35
1.	Experimental Evaluation.....	35
1.1.	The First Pot Experiments.....	35
1.2.	The Second Pot Experiments.....	35
2.	Antibiosis Against Fungal Pathogens.....	36
3.	Antibiotic Marking of Bacterial Strains/ Isolates.....	36
4.	Bacterial Mating (Bacterial Conjugation Experiments).....	37
5.	Protein Techniques.....	38
5.1.	Preparation of the Total Cellular Protein of <i>Bradyrhizobium</i> Strains/ Isolates and New Transconjugants.....	38
5.2.	SDS-PAGE Protein Electrophoresis.....	38
6.	Analytical Methods.....	39
6.1.	Soil Analysis.....	39
6.2.	Plant Materials.....	39
7.	Statistical Analysis	39
	RESULTS	40
1.	Screening the Symbiotic Effectiveness of Different Rhizobial Strains/ Isolates with Different Peanut Cultivar.....	40
1.1.	Evaluation the Symbiotic Effectiveness of Different Rhizobial Strains/Isolates with Peanut Cultivar, Giza5.....	40
1.2.	Evaluation the Symbiotic Effectiveness of Different Rhizobial Strains/Isolates with Peanut Cultivar, Giza6.....	42
1.3.	Evaluation the Symbiotic Effectiveness of Different Rhizobial Strains/Isolates with Peanut Cultivar, Ismailia1.....	44

1.4.	Evaluation the Symbiotic Effectiveness of Different Rhizobial Strains/Isolates with Peanut Cultivar, Gregory.....	46
1.5.	Evaluation the Symbiotic Effectiveness of Different Rhizobial Strains/Isolates with Peanut Cultivar, NC	47
1.6.	Evaluation the Symbiotic Effectiveness of Different Rhizobial Strains/Isolates with Peanut Cultivar, Early Bunch	49
2.	Screening the Antagonistic Activity of Rhizobacterial Isolates Against Fungal Growth.....	51
3.	Bacterial Conjugation.....	53
3.1.	Antibiotic Marking for Bacterial strains/ isolates.....	53
4.	Evaluation of New <i>Rhizobium</i> Transconjugants.....	56
4.	Evaluation the Symbiotic Effectiveness of New <i>Rhizobium</i> Transconjugants	56
4.1.1.	Evaluation the Symbiotic Effectiveness of New <i>Rhizobium</i> Transconjugants with peanut cultivar, Giza6.....	56
4.1.2.	Evaluation the Symbiotic Effectiveness of New <i>Rhizobium</i> Transconjugants with peanut cultivar, Gregory.....	58
4.1.3.	Evaluation the Symbiotic Effectiveness of New <i>Rhizobium</i> Transconjugants with peanut cultivar, Early Bunch.....	60
4.2.	Evaluation the Antagonistic Activity of New <i>Rhizobium</i> Transconjugants	62
5.	Proteomic Analysis.....	63
5.1.	Protein Analysis of Peanut Nodulated Bradyrhizobial Strains/ Isolates.....	63
5.2.	Protein Analysis of Parent Bacterial Strains/ Isolates and New Transconjugants.....	64
	DISCUSSION	67
	SUMMARY	74
	REFERENCES	77
	ARABIC SUMMARY
