Abstract	VI

CHAPTER (1)

INTRODUCTION AND LITERATURE SURVEY

1.1 Definition of amorphous material	1
1.2 Preparation techniques of amorphous material	2
1.2.1 Conventional melting technique	2
1.2.2 Sol-gel process	2
1.3 General overview of the structure and types of ferrite	4
1.4 Metal ferrite nanocomposites	5
1.5 Preparation of ferrite	7
1.6 Applications of ferrites	9
1.7 Types of magnetic materials	10
1.8 Polarization in solids	13
1.9 Electrical properties of solids	14
1.9.1 DC electrical conductivity of solids	14
1.9.2 AC conductivity of solids	15
1.10 Dielectric properties of solids	16
1.10.1 Frequency and temperature dependence of the dielectric constant	16

1.10.2 Frequency and temperature dependence of the dielectric loss	18
1.11 Magnetic susceptibility of the material	19
1.12 Literature survey	20
1.12.1 XRD analysis	20
1.12.2 Thermal analysis	24
1.12.3 Electrical properties	25
1.12.4 Dielectric properties	27
1.12.5 Magnetic properties	29

CHAPTER (2)

EXPERIMENTAL TECHNIQUES

2.1 Introduction	31
2.2 Preparations of the composite samples	31
2.3 Characterizations of the samples	35
2.3.1 X-ray diffraction patterns (XRD)	35
2.3.2 Thermal analysis	35
2.3.3 Microstructure of the prepared powder	35
2.4 Electrical measurements	36
2.4.1 DC conductivity measurements	36
2.4.2 AC Conductivity and Dielectric measurements	36
2.5 Magnetic susceptibility measurements	38

CHAPTER (3)

RESULTS AND DISCUSSION

3.1 Characterization of the investigated samples	39
--	----

3.1.1 XRD analysis	39
3.1.2 Thermal Gravimetric Analysis (TGA)	42
3.1.3 Microstructure of the prepared powder	43
3.2 DC Electrical conductivity	47
3.2.1 The Temperature dependence of dc conductivity	47
3.2.2 Current- Voltage (I-V) Characteristics	53
3.3 AC Electrical conductivity	56
3.3.1 The Temperature dependence of ac conductivity	56
3.3.2 The Frequency dependence of ac conductivity	61
3.4 Dielectric Properties	66
3.4.1 The Temperature dependence of the dielectric constant	66
3.4.2 The Frequency dependence of the dielectric constant	70
3.5 The Dielectric Loss	74
3.5.1 The Temperature dependence of the dielectric loss	74
3.5.2 The Frequency dependence of the dielectric loss	78
3.6 Composition variation of electrical and dielectric properties	84
3.6.1 Composition dependence of electrical conductivity	84
3.6.2 Composition dependence of the dielectric properties	86
3.7 Magnetic Susceptibility Results	88

Conclusions
