

CONTENTS

Subjects	Page
Summary	i
CHAPTER (I)	1
(A)Introduction	1
- Methods of polymerization.....	2
- Free radical polymerization.....	6
-Kinetics of Free Radical Polymerization.....	9
-Copolymerization.....	12
-Binary Copolymerization Reactions.....	14
-Monomer Reactivity Ratios.....	15
-Monomer Reactivity Ratios: solvent effects	18
-Methods of Determination of Monomer Reactivity Ratios.....	20
-Factors affecting monomer reactivity ratios.....	23
(B)Literature survey	25
(C)Aim of the work	51
CHAPTER (II)	
Materials and methods	53
(A) Materials	53
(B)Methods	53
CHAPTER (III)	60
Results and discussion	
(A)Synthesis and polymerization of 2-(N-phthalimido) ethyl methacrylate monomer	60

1-Preparation of N-(2-hydroxyethyl) phthalimide (NHEP).....	60
2-Synthesis of 2-(N-phthalimido)ethyl methacrylate).....	60
3-Polymerization of 2-(N-phthalimido) ethyl methacrylate.....	65
(B)Exchange reactions.....	69
1-Exchange reactions with amines.....	69
2-Exchange reactions with hydroxylated compounds.....	77
3-Exchange reactions of poly-PEMA with cyclohexanol at different time.....	80
(C)Copolymerization reactions.....	87
1- Estimation of monomer reactivity ratios for Copolymerization of 2-(N-phthalimido)ethyl methacrylate with methylacrylate, ethylacrylate and butylacrylate.....	89
2- Estimation of monomer reactivity ratios for copoly- merization of 2-(N-phthalimido) ethyl methacrylate with styrene and vinyl acetate	110
(D)Biological activity.....	128
References.....	138
Summary in Arabic.....
