Philosophy of International Relations
And Directing Them to Establish an International Ethical System

Introducing international relations under philosophy can shed new light on nature of such relations and highlight an aspect of its features which could have escaped sight of other specialists. We can't really understand why thought which is capable of analysis and interpretation of real or supernatural social features showed stop at borders of states and deprive itself from crossing then to understand relations at level of the whole world. On the contrary philosophical thought can renew issues of philosophy.
