

# **LIST OF CONTENTS**

<b>Chapter</b>		<b>Page</b>
■	Introduction. ....	<b>1</b>
■	Aim of the study. ....	<b>4</b>
■	Literature Review. <i>Chapter I:</i> Anatomy of breast and physiology of breast milk production" physiology of lactation". ....	<b>5</b>
	<i>Chapter II:</i> Preparation of breast feeding. ....	<b>28</b>
	<i>Chapter III:</i> Breast engorgement. ....	<b>47</b>
	<i>Chapter IV:</i> Management of breast engorgement. ....	<b>57</b>
	<i>Chapter V:</i> Role of the nurse midwives in promoting successful lactation and overcome breast engorgement. ....	<b>86</b>
■	Subjects and Methods. ....	<b>94</b>
■	Results. ....	<b>104</b>
■	Discussion. ....	<b>134</b>
■	Conclusion ....	<b>169</b>
■	Recommendations. ....	<b>170</b>
■	Summary. ....	<b>172</b>
■	References. ....	<b>175</b>
■	Appendices. ....	
■	Arabic Summary.	

## **LIST OF TABLES**

<b>No</b>	<b>Title</b>	<b>Page</b>
<b>1.</b>	Distribution of the samples according to their general characteristics.	<b>106</b>
<b>2.</b>	Distribution of the samples according to their family history.	<b>107</b>
<b>3.</b>	Distribution of the samples according to their follow up antenatal care.	<b>108</b>
<b>4.</b>	Distribution of the samples according to their knowledge about the important of breast feeding.	<b>109</b>
<b>5.</b>	Distribution of the samples according to their knowledge about the component, technique of breast feeding & infant hunger & satiety cues.	<b>110</b>
<b>6.</b>	Distribution of the samples according to their knowledge about the breasts engorgement	<b>112</b>
<b>7.</b>	Comparison between study group and control group regarding score of knowledge about breast feeding and breast engorgement.	<b>114</b>
<b>8.</b>	Distribution of the samples according to their practices regarding the breasts feeding	<b>116</b>
<b>9.</b>	Distribution of the sample according to scoring of redness in the breasts engorgement throughout follow up visits (by using Reeda scale).	<b>120</b>
<b>10.</b>	Distribution of the sample according to scoring of pain in the breasts engorgement (by using Analog scale)	<b>121</b>
<b>11.</b>	Distribution of the sample according to scoring of edema in the breasts engorge by using (Newton's scale)	<b>122</b>

<b>12.</b>	Distribution of the sample according to degree of measuring temperature (pyrexia)	<b>123</b>
<b>13.</b>	Comparison between study group and control group regarding complete recovery from signs & symptoms of breast engorgement throughout follow up visits.	<b>125</b>
<b>14.</b>	Relationship between degree of breast engorgement of the studied women in the two groups and their general characteristics.	<b>126</b>
<b>15.</b>	Relationship between degree of breast engorgement of the studied women in the two groups and their antenatal follow up.	<b>127</b>
<b>16.</b>	Relationship between degree of breast engorgement of the studied women in the two groups and their practices (technique) of breast feeding.	<b>128</b>
<b>17.</b>	Relationship between recovery level of breast engorgement of the studied women in the two groups throughout follow up visits and their age.	<b>129</b>
<b>18.</b>	Relationship between recovery level of breast engorgement of the studied women in the two groups throughout follow up visits and their education.	<b>130</b>
<b>19.</b>	Relationship between recovery level of breast engorgement of the studied women in the two groups throughout follow up visits and their occupation.	<b>131</b>
<b>20.</b>	Relationship between recovery level of breast engorgement of the studied women in the two groups throughout follow up visits and their age of marriage.	<b>132</b>
<b>21.</b>	Relationship between recovery level of breast engorgement of the studied women in the two groups throughout follow up visits and their residence.	<b>133</b>

## **LIST OF FIGURES**

### **In the review**

<b>No</b>	<b>Title</b>	<b>Page</b>
<b>1-1 to 1-5</b>	Anatomy and physiology of the breasts.	<b>5,6,7,9</b>
<b>2-1 to 2-4</b>	Physiology of breast milk production "physiology of lactation".	<b>9,10,11</b>
<b>3-1 to 3-9</b>	Breast feeding position and latching.	<b>31 -35</b>
<b>3-10 to 3-18</b>	Technique of breast feeding.	<b>36-39</b>
<b>4-1 to 4-3</b>	Anatomical variations of breasts & its management.	<b>46, 58</b>
<b>5-1 to 5-2</b>	Breast engorgement.	<b>49, 53</b>
<b>6-1 to 6-2</b>	Management of breast engorgement.	<b>63, 69</b>
<b>7-1 to 7-7</b>	Nipples massage (reverse pressure softening).	<b>67</b>
<b>8-1 to 8-3</b>	Breast expression "manual hand expression".	<b>70,71</b>
<b>9-1 to 9-3</b>	Types of pumps..	<b>76,77</b>
<b>10-1 to 10-4</b>	Manual breast pumps.	<b>77</b>
<b>11-1 to 11-2</b>	Battery breast pump.	<b>77</b>
<b>12-1 to 12-17</b>	Hands-free pumping.	<b>81, 82</b>
<b>13-1</b>	Using cabbage leaves.	<b>85</b>

## **In the result**

<b>No</b>	<b>Title</b>	<b>Page</b>
<b>1.</b>	Distribution of the samples according to source of their knowledge	<b>115</b>
<b>2.</b>	Distribution of the samples according to severity of breast engorgement before application of nursing measures.	<b>118</b>
<b>3.</b>	Distribution of the samples according to severity of signs and symptoms of breast engorgement before nursing measures.	<b>119</b>
<b>4.</b>	Comparison between study and control group regarding their complete recovery from breast engorgement through follow up visits.	<b>124</b>

## **LIST OF APPENDICES**

<b>No</b>	<b>Title</b>
<b>Appendix 1</b>	Interview questionnaire and observational & follow up signs & symptoms of breast engorgement check list.
<b>Appendix 2</b>	Booklet for mothers about Nursing measures for Relief Breast Engorgement.
<b>Appendix 3</b>	Protocol.

## **LIST OF ABBREVIATIONS**

<b>Abbreviation</b>	<b>Mean of Abbreviation</b>
<b>WFPHA</b>	World Federation of Public Health Association.
<b>AAP</b>	American Academy Of Pediatrics.
<b>NAPNAP</b>	National Association of Pediatric Nurse Associates and Practitioners.
<b>ADA</b>	American Dietetic Association.
<b>BMR</b>	The Basal Metabolic Rate.
<b>DHA</b>	Docosahexaenoic Acid.
<b>ARA</b>	Arachidonic Acid.
<b>ATP</b>	Adenosine Triphosphate.
<b>DNA</b>	Deoxyribonucleic Acid.
<b>RNA</b>	Ribonucleic Acid.
<b>WHO</b>	World Health Organization.
<b>IGA</b>	Immunoglobulin A.
<b>GIT</b>	Gastrointestinal Tract.
<b>SIDS</b>	Sudden Infant Death Syndrome
<b>IQ</b>	Intelligence Quotient.
<b>LAM</b>	Lactational Amenorrhea Method.

<b>WIC</b>	Women, Infants, and Children
<b>FIL</b>	Feedback Inhibitor Of Lactation.
<b>RPS</b>	Reverse Pressure Softening.
<b>HCP</b>	Health Care Provider.
<b>ANA</b>	Antenatal Care.
<b>TBA</b> s	Traditional Birth Attendances.
<b>ILCA</b>	The International Lactation Consultant Association
<b>ACTH</b>	Adrenocorticotrophic Hormone.
<b>TSH</b>	Thyroid Stimulating Hormone.
<b>HMBANA</b>	Human Milk Banking Association of North America.
<b>MOHP</b>	Ministry of Health and Population.
<b>ILLI</b>	La Lech League.
<b>NHSCMD</b>	National Health Service Center for Midwives and Dissemination.
<b>NAS</b>	National Academy of Sciences.
<b>CGHFBCB</b>	Collaborative Group of Hormonal Factors in Breast Cancer and Breastfeeding.
<b>PBWRC</b>	Princess Basma Women's Resource Center.
<b>RS</b>	Reeda Scale.
<b>VAS</b>	Visual Analog Scale.
<b>ACOG</b>	American College of Obstetricians and Gynecologists.
<b>JAMA</b>	Journal of American Medical Association.
