Introduction	1
Aim of The Study	5
Research hypotheses	6
Review of Literature	7
Chapter (I): Ovarian Cancer	7
Chapter (II): Chemotherapy	21
Chapter (III): Side Effects of chemotherapy	34
Chapter (IV): Nursing guideline for reliving side effects of chemotherapy	41
Materials and methods	49
Results	58
Discussion	86
Conclusion	98
Recommendations	99
Summary	100
References	104
Appendix	
Arabic Summary	1-3

LIST OF TABLES

Table No.	Item	Page
Table No. (1)	Socio demographic data of studied patients	58
Table No. (2)	Medical data related to studied patients at pre - intervention ,immediate post intervention and three months after.	59
Table No. (3)	obstetric history of studied patients	60
Table No. (4)	Distribution of studied patients by total knowledge	61
Table No. (5)	Patients 'knowledge about ovarian cancer and chemotherapy treatment	62
Table No. (6)	Distribution of studied sample regarding the effect of chemotherapy on patients life	63
Table No. (7)	Distribution of studied patients by total practices score as reported by patients	70
Table No. (8)	Distribution of studied patients by total scale score	71
Table No. (9)	Practices as reported by patients regarding management of chemotherapy side effects.	72
Table No. (10)	Distribution of studied patients regarding nausea at pre intervention ,immediate post intervention and after three months	73
Table No. (11)	Distribution of studied patients regarding vomiting at pre intervention ,immediate post intervention and after three months	74

Table No.	Item	Page
Table No. (12)	Distribution of studied patients regarding diarrhea at pre intervention ,immediate post intervention and after three months	75
Table No. (13)	Distribution of studied patients regarding alopecia at pre intervention ,immediate post intervention and after three months	76
Table No. (14)	Distribution of studied patients regarding mucostitis at pre intervention ,immediate post intervention and after three months	77
Table No. (15)	Distribution of studied patients regarding fatigue at pre intervention ,immediate post intervention and after three months	78
Table No. (16)	Distribution of patient total knowledge scores in relation to their socio demographic characteristics	79
Table No. (17)	Distribution of studied sample total practice score in relation to their socio demographic data	81
Table No. (18)	Distribution of studied women total scale scores in relation to their socio demographic data	83
Table No. (19)	Correlation between total practices as reported by patients and total knowledge and total scale score immediate after intervention.	85

LIST OF figures

Figure No.	Item	Page
Figures of Review		
Fig No. (1)	Female reproductive system	7
Fig No. (2)	structure of an ovary	9
Fig No. (3)	Human ovary showing various stages of egg development	10
Fig No. (4)	cancer of the left ovary	11
Figures of Results		
Fig No. (1)	Distribution of nausea among studied sample during six cycle of chemotherapy treatment	64
Fig No. (2)	Distribution of vomiting among studied sample during six cycle of chemotherapy treatment	65
Fig No. (3)	Distribution of diarrhea among studied sample during six cycle of chemotherapy treatment	66
Fig No. (4)	Distribution of alopecia among studied sample during six cycle of chemotherapy treatment	67
Fig No. (5)	Distribution of mucositis among studied sample during six cycle of chemotherapy treatment	68
Fig No. (6)	Distribution of fatigue among studied sample during six cycle of chemotherapy treatment	69
