

## ***CONTENTS***

	<b><i>Page</i></b>
• <b>Acknowledgement</b>	
• <b>Abstract</b>	
• <b>List of abbreviations</b>	
• <b>Introduction</b>	1
• <b>Aim of the study</b>	6
• <b>Review of literature</b>	
<b>The infection</b>	
-Intensive care unit	7
-Definition of Infection and colonization	12
-The chain of infection	18
-Hospital –Acquired Infections & common infection in ICU.	24
-Incidence of infection.	26
<b>Infection control</b>	
-Historical background to infection control	29
- Controlling of nosocomial infection	30
-Medical & Surgical asepsis	31
- Standard precaution ( universal precautions)	32
-protective clothes	37
- Handling of patient-care equipment and linen	39
- Environmental controls	41
-Cleaning ,Disinfection and sterilization	43
-Disposal of infectious waste	45
-Infection control committee	47
-Role of nurse in hospital infection control	49
• <b>Subjects and methods</b>	54
• <b>Results</b>	64
• <b>Discussion</b>	84
• <b>Conclusion</b>	104
• <b>Recommendation</b>	105
• <b>Summary</b>	107
• <b>References</b>	110
• <b>Appendix I</b>	

• Appendix II	
• Arabic summary	

### *List of figures in Review of literature*

<i>Figure no.</i>	<i>Page</i>
<b>Figure (1):</b> The Chain of infection	22
<b>Figure (2):</b> Ways of infections transmission in Health Care Settings	24
<b>Figure (3):</b> Breaking the Chain of Infection	52

### *List of Tables Review of literature*

<i>Table no.</i>	<i>Page</i>
<b>Table (1):</b> Examples of transmission routes	23
<b>Table (2):</b> Essential standard precautions used in the care of all patients irrespective of whether or not they are diagnosed infectious	34

### *List of Tables in results*

<i>Table no.</i>	<i>Page</i>
<b>Section (I)</b>	
<b>Table (1):</b> Distribution of the studied nurses according to age, sex, education, Job, experience, and marital status.	65
<b>Section (II)</b>	
<b>Table (2):</b> Distribution of the studied nurses according to previous training. Pre-employment screening & periodic examination during the work, and infection control committee	66
<b>Table (3):</b> Distribution of the studied nurses according to the Obstacles during application of infection control, and suggestions to control the spread of infection.	67

<b>Section (III)</b>	
<b>Table (4):</b> t- test for the total & subtotal mean knowledge scores of study group subjects throughout the study periods.	68
<b>Table (5):</b> Two by two t-tests for nurse's knowledge scores all through the four assessments	69
<b>Table (6):</b> Total respondents knowledge scores levels in percentages throughout the four assessments	70
<b>Table (7):</b> The mean total & subtotal practice scores of study group subjects throughout the four assessments.	71
<b>Table (8):</b> Two by two t-tests for nurse's practices scores throughout the four assessments.	73
<b>Table (9):</b> Total respondents practices scores levels in percentages throughout the four assessments	74
<b>Table (10):</b> Correlation coefficient for nurses' knowledge, practice, age and years of experience	75
<b>Section (IV)</b>	76
<b>Table (11):</b> The relationship between nurses' knowledge and marital status throughout the four assessments	
<b>Table (12):</b> The relationship between nurses' knowledge and job throughout the four assessments	77
<b>Table (13):</b> The relationship between nurses' knowledge and previous training throughout the four assessments.	78

<b>Table (14):</b> The relationship between nurses' knowledge and education throughout the four assessments.	79
<b>Table (15):</b> The relationship between nurses' practice and marital status throughout the different four assessments.	80
<b>Table (16):</b> The relationship between nurses' practice and job throughout the different four assessments.	81
<b>Table (17):</b> The relationship between nurses' practice and previous training throughout the different four assessments.	82
<b>Table (18):</b> The relationship between nurses' practice and Education throughout the different four assessments.	83
