List of tables	iii
List of figures	vi
List of abbreviations	vii
Abstract	ix
Operational definitions	x
Introduction & Aim of the study	1
Review of literature	4
Part I: overview about Diabetes mellitus	4
• Anatomy of the pancreas and function of insulin	4
• A historical overview of DM	5
• Definition of DM	6
• Epidemiology of DM	6
• Classification of DM	7
• Etiology and Risk Factors of DM	9
• Pathophysiology of DM	10
• Clinical manifestations of DM	12
• Diagnosis of diabetes mellitus	13
• Laboratory Tests Related to DM	15
• Complications of DM	17
• Acute complications of DM	18
• Long-term complications of DM	21
• Prevention of Type 2 DM	26
• Management of DM	28
• Medication	29
• Dietary Management	35
• Exercise Intervention	37
• Self monitoring of blood glucose	40
• Hygienic care	41
Part II: Self efficacy	
• Definition of self efficacy	44
• Theory of self efficacy	46

<i>Contents</i>	<i>Page</i>
• Self efficacy of people with diabetes	47
• Self efficacy and health	47
• Ways to improve self efficacy in diabetes	48
• Factors affecting self management behaviors	48
• Instruments of Diabetes Management Self-Efficacy	50
• Diabetes Self-efficacy Scale (DSES)	51
• Diabetes Empowerment Scale (DES)	51
• Confidence in Diabetes Self-Care (CIDS)	51
• Diabetes Management Self-efficacy Scale (DMSES)	52
• Rationales for selecting the DMSES	53
Part III: Health education	
• Definition of health education	55
• Aim of health education program	55
• Diabetes Self-Management Education	56
• Role of Diabetes Educators	56
• National Standards for Diabetes	56
• Basic Diabetes Survival Skills Education	57
Part IV: Nursing Role in Management of DM	
• Nursing assessment	58
• Nursing diagnosis	59
• Intervention	59
• Outcomes and goals	60
• Evaluation	60
Subjects & Methods	69
Results	77
Discussion	119
Conclusion & Recommendations	130
Summary	132
References	136
