

Contents

Title	Page
Introduction	1
Aim of the work	3
Review of literature	4
Assessment of Mitral Regurgitation	4
Diagnosis of Mitral Regurgitation	6
Normal Mitral Valve Structure and Function	7
Causes of mitral regurgitation	10
Quantification of mitral regurgitation	14
Spectral Doppler	18
Pulmonary vein flow	19
Quantitative Doppler	21
Vena contracta measurements	25
Transthoracic Versus Transoesophageal Imaging	27
Color M-mode velocity propagation	30
Methods of determining flow propagation velocity	32
Pressure and flow propagation	34
Pressure gradient formation	36
Vortex formation	37
Desynchronize of relaxation	38
Left ventricular geometry	38
Haemodynamic determinants of velocity propagation: data from clinical and experimental studies	40
Patients & Methods	44
Statistical analysis	52

Title	Page
Discussion	72
Summary and conclusion	82
Recommendations	84
References	85
