

CONTENTS

Chapter	Title	Page
1	Introduction	1-6
2	Aim of the work	7
3	Pathology of GIST <i>(1) Incidence</i> <i>(2) Cells of origin "ICCS"</i> <i>(3) Aetiology and risk factors</i> <i>(4) Classification</i> <i>(5) Anatomical location</i> <i>(6) Grading</i> <i>(7) Histopathology</i> <u>A- Immunohistochemical features</u> <u>B- Protein, gene expression in GISTs</u> <u>C- Analysis of C-KIT mutations</u> <i>(8) Rare types of GISTs</i> <u>A- Gastrointestinal autonomic nerve tumors</u> <u>B- Pediatric GISTs</u> <u>C- Familial GISTs</u> <u>D- GISTs in association with Carney's triad and Carney's dyad</u> <u>(Carney-Stratakis syndrome)</u>	8-32
4	Diagnosis of GIST A- CLINICAL FEATURES	33-60

	<i>B- IMAGING FEATURES</i> <i>1- Plain radiography</i> <i>2- Ultrasonography</i> <i>A- Trans-abdominal sonography</i> <i>B- Endoscopy, Endoscopic ultrasound (EUS)</i> <i>3- Conventional barium studies</i> <i>4-CT scan, Contrast enhanced CT</i> <i>5- MRI</i> <i>6- PET scan</i> <i>7- Angiography</i>	
5	Treatment of GIST <i>(1) Surgical resection</i> <i>(2) Endoscopic resection</i> <i>(3) Laparoscopic resection</i> <i>(4) Chemotherapy</i> <i>A- Imatinib mesylate</i> <i>B- Sunitinib malate (SU1248)</i>	61-87
6	Summery	88-89
7	References	90-103
