

Index

List of Tables	III
List of Figures	IV
Abbreviations	V-VIII
Introduction& Aim of the Essay	1-2
Chapter (1) Overview On Diabetes Mellitus Definition Anatomy of Pancreas Histology of the pancreas Epidemiology& Causes Pathogenesis& Character of Types of Diabetes Diagnosis of Diabetes Mellitus Complications of Diabetes Mellitus Managements of Diabetes Mellitus	3-65
Chapter(2) Stem Cell Basics Definition Properties Types of Stem Cells Applications of Stem Cells Challenges Facing Applications of Stem Cell Therapy Ethical Issues of Stem Cell Therapy Islamic Perspective on Stem Cell Research	66-98

Chapter(3) Stem Cells as A potential Cure of Diabetes	99-147
Pancreas and B-cell Development	
The Potential of Embryonic Stem Cells and Induced Pluripotent Stem Cells as a Source of Insulin_Producing Cells	
Mesenchymal Stem Cells (MSCs)as a source of Insulin Producing Cells(IPCs)	
Placenta derived multipotent Stem Cells(PDMSCs) induced to differentiate into insulin_positive cells	
Generation of B-cells from Pancreatic Duct Cells and /or Stem Cells	
Generation of B-cells from Acinar Cells	
Adult Cell Reprograming:Using Non_Pancreatic Cell Sources to Generate B_cells for Treatment of Diabetes	
In Vivo Regeneration of B_cells as a potential of Treatment of Diabetes	
Ex Vivo Expansion of Human Pancreatic Islets& its Role in Treatment of Diabetes	
Future Perspectives of Stem Cell Therapy in Treatment of Diabetes	
Summary& Conclusion	148
References	149-199
Arabic Summary
