Subject	Page
List of Figures	I
List of Tables	IV
Abstract	VI
Introduction	1
Objectives of the Research	2
Structure of the Thesis	2
Previous Trials and Experiences	3
1. Remote Sensing Data Concepts and Characteristics	
1.1 Introduction to Remote Sensing	7
1.2 Brief History of Remote Sensing	8
1.3 Introduction to Satellite Imagery	9
1.4 Satellite Sensor Characteristics	10
1.4.1 Spatial Resolution	10
1.4.2 Spectral Resolution	11
1.4.3 Temporal Resolution	12
1.4.4 Radiometric Resolution	13
1.5 Types and Classes of Remote Sensing Data	14
1.6 High Resolution Remote Sensing Satellites	15
1.6.1 Landsat	15
1.6.2 SPOT	20
1.6.3 EgyptSat-1	24
1.6.4 IRS	25
1.6.5 ALOS	26
1.6.6 EROS	27
1.6.7 IKONOS	28
1.6.8 QUICKBIRD	30
1.6.9 WORLDVIEW -1	32
1.6.10 GeoEye-1	32
1.7 Applications of Remote Sensing	33
1.7.1 Mapping	33

1.7.2 Geology	35
1.7.3 Agriculture	35
1.7.4 Forestry	36
1.7.5 Rangeland Resource Monitoring	36
1.7.6 Water Resources	36
1.7.7 Urbanization (Land Use Land Cover Changes)	36
1.7.8 Environmental Assessment	37
2. Orthorectification of Satellite Images	
2.1 Definition of Satellite Imagery	38
2.2 Satellite Images Collection Geometric Errors	38
2.2.1. The Systematic Errors	39
2.2.2. The Random Errors	39
2.3 Digital Elevation Model (DEM)	39
2.3.1. Different DEM Data Sources	40
2.3.1.1. Aerial and Space Images	40
2.3.1.2. Existing Topographic Maps	40
2.3.1.3. Synthetic Aperture Radar Imaging (SAR)	41
2.3.1.4. Airborne Laser Scanning (LIDAR)	42
2.3.1.5. Global Positioning System (GPS)	43
2.3.1.6. Traditional Surveying Techniques	43
2.3.2 The Quality of DEM	44
2.4 Orthorectification of Satellite Imagery	44
2.4.1. The Ground Control Points (GCPs)	45
2.4.2. The Transformation Process	45
2.4.2.1. Polynomial Transformation	45
2.4.2.2. Affine Transformation	48
2.4.2.3. Projective Transformation	49
2.4.2.4. Piecewise Transformation	50
2.4.2.5. Digital Differential Rectification	51
2.4.2.6. Direct linear Transformation	52
2.4.3. The Resampling Process	53

2.4.3.1. The Nearest Neighbor Technique	53
2.4.3.2. The Bilinear Interpolation Technique	54
2.4.3.3. The Cubic Convolution Technique	55
2.4.4 Accuracy Investigation of Orthorectification Process	56
2.5 Features Vectorization	58
2.5.1. Manual Vectorization	58
2.5.2. Semi-Manual Semi-automatic Vectorization (On Screen Digitizing)	59
2.5.3. Automatic Vectorization	61
3. Geographic Information Systems (GIS)	
3.1 The Definition of Geographic Information Systems	62
3.2 Components of GIS	63
3.2.1. People	64
3.2.2. Procedures	64
3.2.3. Hardware	65
3.2.4. Software	65
3.2.5. Data	65
3.3 GIS Tasks	66
3.3.1. Input	66
3.3.2. Manipulation	66
3.3.3. Management	67
3.3.4. Query	67
3.3.5. Analysis	67
3.3.6. Visualization	69
3.4 GIS Spatial Data Representation	70
3.4.1 Raster Data Model	70
3.4.2 Vector Data Model	71
3.4.3 Raster and Vector Advantages and Disadvantages	72
3.5 GIS Database Design	73
3.5.1.Data Base Management System	74
3.5.1.1. Advantages of Using a DBMS	79
3.5.1.2. Disadvantages of Using a DBMS	80

4. Practical Applications

4.1 Study Area Description	82
4.1.1 Selecting the Suitable Satellite Imagery for the Desired Mapping Scale	82
4.1.2 Data Sources	83
4.1.3 Used Softwares	85
4.2 Methodology of Investigation	86
4.2.1 Orthorectification of the Satellite Images	86
4.2.1.1 Generation of the Digital Elevation Model	86
4.2.1.2 Checking the Vertical Accuracy of the Ground Digital Elevation Model	90
4.2.1.3 Checking the Vertical Accuracy of the Global (SRTM) Digital Elevation Model	91
4.2.1.4 Generation of the Digital Building Model	92
4.2.1.5 Checking the Vertical Accuracy of the Digital Building Model	94
4.2.1.6 Possibility of Using Google Earth Points as Control Points	95
4.2.1.7 Orthorectification of GEO EYE Satellite Image Using GPS Control Points and Ground DEM and DBM	100
4.2.1.8 Orthorectification of QUICKBIRD Satellite Image Using GPS Control Points and Ground DEM and DBM	106
4.2.3 On Screen Digitizing and Production of the Final Thematic Maps	112
4.2.4 Checking the Planimetric Accuracy of the Map Production Process	115
4.3 Building a GIS for the Study Area	118
4.3.1 Creation of the Database for the Study Area	118
4.3.2 Analysis and Planning for Study Area	119
4.3.3. Applications of GIS	121
4.3.3.1. Pre-Planning of Water Networks for the Study Area	121
4.3.3.2. Pre-Planning of the Sewage Networks for the Study Area	132

5. Conclusions and Recommendations

5.1 Conclusions.	145
5.2 Recommendations.	146

6. References	147
