## Introduction:

His right personal successes makes him feel normal Psoaúh and safety while the owner expected the strike in the personal circle of failure and strikes at work and in the surroundings of prisoners; and then in the society, adding to his sense and his sense of a lack of harmonization and poor ability to continue to live successfully.

And mental health and efficiency Alantjayh each affects the other and influenced by it. This is the object of that study, the axes on some mental disorders neurotic and their relationship to competence Alantjayh and verified empirically from the correlation, which reflected the effects of each dimension in which the other Valkvaih Alantjayh is the adequacy of production, which reveals the tender of the individual and his ability to deliver accurately and workmanship for its manner achieve effective role in society, which has reached its position and that in turn bring him contentment and satisfaction of needs, which also reflect the target and mental balance, which enjoyed.

The true religion of Islam put centuries-old concepts of the original, which is described today Balhaddath; where hurry to work and Highnesses him to the rank of worship because of what can be reflected in the ability of the individual and the energies and make him feel its efficiency and gives him satisfaction and psychological, mental and pushes him to continue to seek and tranquility; influence the behavior of others, the way in which he refers accept it and the community.

If the concern property humanitarian need not be a pathology; so that he could be a driving force stimulates the individual to grow and prosper; as a result of the awareness of the responsibility incumbent upon, and that is rooted in the heart of existence, but that, if exceeded both nature seemed to its effects on the performance of individual duties and his efficiency and productivity; and not, not this Shan concern only, but all mental disorders, which exceed the limits of nature and both of depression or fears than logical and rational to Alamntqah and lack of reasonableness.

## The importance of the study:

Look at the importance of this study confirm the nature of the correlation between the performance of the individual and the safety of the community on the one hand and the psychological integrity of the individual and the growth of society on the other.

***It can detect about the importance of the study as follows:***

- 1) **the importance of the theory:** is important theoretical and also applied to stand on the most important blessings that God bestowed upon us by a blessing of creation of man and filed God in this man of capacity; achieved through life that pleases them of God and bring him happiness mundane; and closer to Paradise, which promise God's servants the righteous.
- 2) As the importance of the study lies in the importance and effectiveness of members of the community itself; and At dmh that community agencies, institutions reflect the power of the performance of the individual; who hold these institutions and agencies. This study confirms the importance of one of the positive values
- 3) that represent a platform for life, namely the value of production of good and of the excellence and success; and what can be achieved by production of a sense of pride humanely individual and the tender; and achieved the same and the development of society and reflect the integrity of the psychological and productivity.

***The importance of applied lies in the following:***

- Experimental verification of the relationship Alaasbh psychological (anxiety - depression - phobia) Bulk ipih productivity and the consequent strengthening of that relationship in a positive correlation between variables; and avoid Walt and interaction of factors could adversely affect the individual and the productivity of individuals.

***The research problem and study:***

The link between mental disorders and the enjoyment of competence of the individual productivity is the focus of the problem of the current study. That relationship, which depends on the performance and quality of hand and affect the integrity of Alferdalnevsah Nahiy other.... It is the heart and essence of the research and can highlight the problem of the research in the following questions:

- 1) Is there a correlation between the type of any individual suffering from mental Alaasbh between efficiency and productivity?
- 2) Does the neurotic anxiety associated with less efficient productivity or whether its effects on production efficiency or non-existent a few?

- 3) Is depression associated with efficient production? Is depressed down his performance and the actual practical or is it that it increases the production?
- 4) Do you fear associated with abnormal efficiency performance of the real person in a manner affecting the production or is it that those concerns stand away from the level of performance as long as they are not linked to the nature and source of stimuli and those concerns.
- 5) Are there differences between the nationality of the individuals in the level of production efficiency?
- 6) Are there differences between the nationality of the individuals in the level of both anxiety and depression and fears?

All of these questions reveal the real problem of the current study, which we hope to answer it clearly results that we will achieve it.

### **objectives of the study:**

The present study aimed discuss the nature of the relationship between the three neurotic disorders and production efficiencies on a sample Kuwait; and the ramifications of this primary goal several sub-goals. Vimal summarized the following:

- 1) attempt to shed light on the level of suffering of members of a sample study of disorders of the three neurotic or not
- 2) identify the level of performance of the sample community ..... As well as both males and females in production efficiency.
- 3) identify the nature of sexual differences and their significance in the psychological variables of the study for each of the anxiety disorders; and depression; and phobias.

### **curriculum and procedures:**
