

Study Summary

Thanks be to God , Whom Heaven has been pillardlessly raised by , and Peace Be Upon our Prophet , Muhammed .

Between our hands , a book entitled " Sharh Moshkel Al. Hadeeth " (the Explanation of Hadeeth Confusion " or " Enlightening Minds for Solving HadeethConfusion of Prophet Muhammed (PBUH)

It is a manuscript written by Abu.Muhammed Abd.El Galeel

Al.Quasry , a Grand Sheikh of Hijri 6th century , in which he handles 59 chief Hadeeths which are among those that include the Attributes of God AlMighty, and evoke fanciful resemblance between the Creator and the creature , like personal Attributes of Hands , fingers , face , and Action ones like Descendence , coming , laughter , exclamation , joy and others. The book consisted of 137 paper of manuscript.(a)- and 54 of manuscript(b)- elucidating those Hadeeth with proofs from Qura'an and Sunnah imitating men of speech's and mysticism's way as it has been described as that in its few translations depending in the first place on dictionary interpretations .

The author's attitude from the beginning was setting a glorious Salafi rule in treating and understanding the Attributes of Allah . However , he disagreed with it either under pretext (but not a real one) during his explanations to get deeper insight in understanding the Attributes and reaching the hidden meanings " because of the stop of those Grand Sheikhs who avoided handling those attributes lest they should make any resemblance . " , as he said .

Adopting such a method springs from two great reasons

First , Resemblance or Fancy .

Second , Null Evidence .

What I reached in summary is that any Attribute given to Allah by himself or his Prophet, must be truly proved , regardless of any discussion or doubt ;because research results had led to sharp disputes among the Islamic scientists. So any researcher in the field of Faith should support their study with clear-cut proofs adhering the most authentic ways of narration .

Praise and prayer be given to our Prophet Muhammed
