Item	Page
Aim of the essay.	I
List of abbreviations.	II
List of figures.	II
Review of literature:	
Introduction.	IV
Chapter 1: Potassium homeostasis:-	1
1- Basic concepts.	1
2- Factors affecting potassium balance.	7
3- Renal handling of potassium.	12
4- Circadian rhythm of plasma potassium excretion.	19
Chapter 2: Hypokalaemia:-	23
1- Definition.	23
2- Incidence.	23
3- Causes:	
a) Transcellular shift.	24
b) Potassium depletion.	27
4- Clinical picture of hypokalaemia.	34
5- Management of hypokalemia.	38
Chapter 3: Hyperkalaemia:-	46
1- Definition.	46
2- Incidence.	46

3- Causes:	46
a) Pseudohyperkalaemia.	47
b) True hyperkalaemia:	47
- Increase potassium load.	47
- Transcellular shift.	48
- Decrease renal potassium excretion.	51
4- Clinical picture of hyperkalaemia.	55
5- Management of hyperkalaemia.	58

Chapter 4: Potassium in selected specific disorders:-

63

1- Potassium and diabetes mellitus.	63
2- Potassium and acute renal failure.	68
3- Potassium and chronic renal failure.	70
4- Potassium and COPD.	72
5- Potassium and bronchial asthma.	75
6 –Others	79
A - Potassium and rhabdomyolysis.	79
B - Potassium and perioperative cardiac arrhythmias.	84
C - Potassium and open heart surgery.	86
D - Potassium channels and coronary dysfunction after cardioplegic arrest.	88
E - Potassium and trauma patients.	90
F- Potassium and burned patients.	94
G- Potassium and apoptosis.	97
Summary	103
References	108
Arabic summary	109
