

Contents

Acknowledgement	i
Abstract	ii
Chapter (1) Introduction and Literature Survey	
1.1 Introduction	1
1.2 Aim of the Present Work	3
1.3 Literature Survey	4
(I) Electrical and Dielectric Properties of PVA	4
(II) Plasticized Solid Polymer Electrolyte	8
(III) Mg Anode	10
(IV) Manganese Dioxides Cathode	11
(V) Pyrite Cathode	13
Chapter (2) Theoretical Review	
2.1 Battery as Renewable Energy Source	18
2.2 Primary Battery	19
2.3 Secondary Battery	19
2.4 How Does A Battery Work	20
2.5 Battery Performance	22
2.5.1 Voltage	23
2.5.2 Capacity	24
2.5.3 Self Discharge	25
2.5.4 Specific Energy And Energy Density	25
2.6 Anode Materials	25
2.7 Cathode Materials	27
2.8 Electrolytes	29
2.8.1 Liquid Electrolyte	30
2.8.2 Polymer Electrolytes	31
2.8.3 Polymer Electrolytes for Batteries	32
2.9 Polymer Host	36
2.10 Polyvinyl Alcohol	37
2.11 Plasticized Solid Polymer Electrolytes	38
2.12 Inert Ceramic Fillers into Polymer Electrolyte	40
2.13 Ethylene Carbonate (EC)	41
2.14 Nanoparticles And Nanocomposite	41
2.15 Polymer Nanocomposites	44
2.16 Silicon	45
2.17 Complex Impedance Spectroscopy	46
2.18 AC Conductivity	51
2.19 Ionic Conductivity	52
2.20 Protonic conduction	57
2.21 Dielectric Properties	61
2.22 Type of Polarization	62
2.22.1 Electronic Polarization	62

2.22.2	Ionic Polarization	62
2.22.3	Dipolar Polarization	62
2.22.4	The Interfacial (Space Charge) Polarization	63
2.23	Dielectric Relaxation	63
Chapter (3) Experimental Techniques		
3.1	Polymer Electrolyte Preparation	66
3.2	Battery Configuration	66
3.3	X-Ray Diffraction Characterization	68
3.4	Scanning Electron Microscope	69
3.5	Thermogravimetric Analysis	69
3.6	FTIR Spectral Characterization	70
3.7	Impedance Spectroscopy	70
Chapter (4) Results and Discussion		
4.1	X-Ray Diffraction Investigation	73
4.2	Scanning Electron Microscope Investigation	76
4.3	Thermogravimetric Analysis	79
4.4	FTIR Spectroscopy	85
4.5	Complex Impedance Analysis	90
4.6	AC Conductivity for Polymer Electrolyte	99
4.7	Frequency Dependent Conductivity for Polymer Electrolytes	102
4.8	Frequency Dependence of the Dielectric Parameters	105
4.9	Temperature Dependence of the Dielectric Parameters	109
4.10	Transference Number Measurement	111
4.11	Discharge Characteristic of the Cell	116
4.12	Electrode Characteristic	119
Conclusion		123
References		125
