

<b>CONTENTS</b>	<b>Page</b>
<b>1. INTRODUCTION</b> .....	1
<b>2. REVIEW OF LITERATURE</b> .....	3
2.1. Chemical composition of flax seeds.....	4
2.1.1. Amino acids content of flax seeds.....	5
2.1.2. Extraction and chemical composition of flax protein isolate.....	6
2.1.3. Amino acids flax protein isolate.....	7
2.1.4. Physical and chemical characteristics of linseed oil.....	7
2.1.4.1. Refractive index.....	8
2.1.4.2. Iodine number.....	9
2.1.4.3. Saponification number.....	11
2.1.5. Fatty acids and glycerides composition of linseed oil.....	13
2.1.6. Unsaponifiable matter (UNS).....	16
2.1.7. Uses of linseed oil in human nutrition.....	17
2.2. Antinutritional factors of flax seeds.....	17
2.2.1. Cyanogenic glycosides.....	18
2.2.2. Protease inhibitors.....	19
2.2.3. Phytic acid.....	21
2.2.4. Tannins (Polyphenols).....	21
2.2.5. Removal of antinutritional compounds.....	25
<b>3. MATERIALS AND METHODS</b> .....	25
3.1. Sampling.....	25
3.2. Removal of cyanogenic glycosides and mucilage.....	25
3.3. Extraction of flax seeds meal protein.....	26
3.4. Analytical methods.....	26
3.5. Extraction of phytate and determination.....	27
3.6. Extraction of fat (defatting).....	27
3.6.1. Physico chemical properties of flax oil.....	27
3.6.1.1. Physical properties.....	28
3.6.1.2. Chemical properties.....	28
3.6.2. Identification and determination of fatty acids of the oil.....	28
3.6.2.1. Methylation.....	28
3.6.2.2. Determination of fatty acids by GLC.....	29
3.6.2.3. Chemical composition of unsaponifiable matter by GLC.....	29
3.7. Determination of amino acids.....	29
3.8. Preparation of protein isolate from flax meal.....	30

3.8.1. Extraction with alkaline solution.....	30
3.8.2. pH of protein precipitation.....	30
3.8.3. Determination of protein.....	30
3.8.4. Precipitation of the extracted protein.....	31
3.9. Determination of trypsin inhibitor activity.....	31
3.9.1. Extraction of protein sample.....	31
3.9.2. Preparation of stock reagents.....	31
3.10. Determination of protein quality by <i>in vitro</i> digestibility index.....	32
<b>4. RESULTS AND DISCUSSION</b> .....	<b>34</b>
4.1. Chemical composition of flax meal.....	34
4.2. Extraction of flax meal protein isolate.....	34
4.2.1. Effect of extracting solvent pH on protein.....	34
4.2.2. Chemical composition of flax meal protein isolate.....	35
4.3. Effect of different treatments on the removal of antinutritional factors.....	40
4.3.1. Effect of different treatments on the removal of phytic acid, trypsin inhibitor, cyanogenic glycosides and total phenolic compounds from flax meal.....	40
4.4. Amino acids content of flax meal and flax meal protein isolate.....	43
4.5. Effect of different treatments on the protein digestibility index of flax meal and protein isolate.....	47
4.6. Physical and chemical properties of flax seed oil.....	47
4.6.1. Fatty acids composition of flax meal.....	51
4.6.2. Unsaponifiable matter composition.....	51
4.6.2.1. Hydrocarbon composition.....	56
4.6.2.2. Sterol composition.....	56
<b>5. SUMMARY</b> .....	<b>57</b>
<b>6. REFERENCES</b> .....	<b>60</b>
<b>7. ARABIC SUMMARY</b> .....	<b>60</b>
