

CONTENTS

Subject	Page
1- INTRODUCTION	1
2- REVIEW OF LITERATURE	5
2.1. Chemical composition of kernel seeds	5
2.1.1. Apricot.....	5
2.1.2. Mango.....	7
2.2 Physical and chemical properties of kernel oils.....	12
2.2.1. Apricot	12
2.2.2. Mango.....	15
2.3. Amino acids content extraction of protein	16
2.3.1. Apricot kernel seeds.....	17
2.3.2. Mango kernels seeds	20
2.4. Antinutritional Factors	21
2.4.1. Apricot kernel seeds.....	21
2.4.2. Mango kernel seed	22
2.4.2.1. Polyphenolic compounds (Tannins)	22
2.4.2.2. Phytic acid	25
2.4.2.3. Protease inhibitors	27
2.5. Removal of antinutritional compounds	27
2.5.1. Apricot kernel seeds	27
2.5.2. Mango kernel seeds	31
2.6. Nutritional utilization of seed kernels	32
2.6.1. Apricot kernels seed	32
2.6.2 Mango kernel seeds.....	34
3- MATERIALS AND METHODS	37
3.1. Materials.....	37
3.2. Separation of mango and apricot kernels from seeds.....	37
3.3. Removal of antinutritional compounds.....	37
3.3.1 Soaking treatment.....	37
3.3.2. Heating treatment.....	38
3.4. Analytical methods.....	38
3.4.1. Determination of moisture, total lipids, crude protein, ash and HCN	38
3.4.2. Determination of total carbohydrate.....	38
3.4.3. Determination of phenolic compounds.....	38
3.4.4. Determination of phytic acid.....	38
3.4.5. Determination of trypsin inhibitor activity	40
3.4.5.1. Extraction of protein sample.....	40

Subject	Page
3.4.5.2. Preparation of stock reagents	40
3.4.6. Extraction of fat, (defatting).....	41
3.4.6.1. Physicochemical properties of apricot and mango kernel oil	42
3.4.6.1.1. Physical properties	42
3.4.6.1.2. Chemical properties.....	42
3.4.6.2. Identification and determination of fatty acids of oils	42
3.4.6.3. Chemical composition of unsaponifiable matter by GLC	43
3.4.7. Determination of amino acids	44
3.4.8. Preparation of protein isolate from apricot and mango kernel meal	44
3.4.8.1. Extraction with alkaline solution.....	44
3.4.8.2. pH of protein precipitation.....	44
3.4.8.3. Determination of protein.....	44
3.5. Preparation of biscuit	45
3.6. Energy values	46
3.7. Organoleptic evaluation.....	46
4- RESULTS AND DISSCUSSION	49
4.1. Chemical composition of whole kernels and defatted flour in apricot and mango kernels seeds	49
4.2. Physical and chemical properties of kernel Oil	51
4.2.1. Apricot	51
4.2.1.1. Fatty acid composition of apricot oil	52
4.2.2. Mango	54
4.2.2.1. Fatty acid composition of mango oil	54
4.3. Effect of pH protein isolation from apricot and mango kernel meal	56
4.3.1. Chemical Composition of protein isolate in apricot and mango kernel seeds	59
4.4. Amino acids composition of apricot, mango kernel and protein isolate	60
4.5. Effect of different treatments on the removal of antinutritional factors from apricot and mango kernel meal	62
4.6. Chemical composition of biscuits produced from soft wheat flour 72% extraction rate substituted with mango seed kernels or defatted apricot seed kernels meals	68

Subject	Page
4.7. Organoleptic evaluation of biscuits produced from soft wheat flour 72% extraction rate substituted with mango seed kernels or defatted apricot seed kernels meals	68
5- SUMMARY AND CONCLUSION	73
6- REFERENCES	77
7- ARABIC SUMMARY	-
