LIST OF FIGURES	xii
INTRODUCTION	1
I : REVIEW OF LITRATURE	3
1- Iron nutrition in plants	3
Mechanisms of iron uptake ✓	4
Higher plant Fe- efficiency reaction mechanisms	6
The Grass System	7
The Dicotyledon and non-grass Monocot. system	7
Correction of iron chlorosis	8
Foilar application	8
Soil application	9
Synthetic Fe chelates	10
Inorganic Fe compounds	12
2- The role of soil CaCO₃ and soil iron in iron nutrition	18
CaCO ₃ particle size distribution and reactivity	19
Soil iron oxides	20
Reactions of iron and carbonate in calcareous soils	21
Reactions of Fe ²⁺ and Fe ³⁺ salts with calcium carbonate	21
Bicarbonate as cause of iron chlorosis	2
3- Reactions between iron and phosphate in calcareous systems	23
II : MATERIALS AND METHODS	26
1- Greenhouse and laboratory experiments on iron nutrition and movement in soils	26
A- Greenhouse experiment	26
Soil analysis	27
First Crop	27

Fertilizer Treatments	27
Grain sorghum plants	30
Second Crop	30
B- Laboratory experiment	30
2- Experiments on the role of soil CaCO_3 and soil iron in iron nutrition	31
CaCO_3 particle size distribution	33
Growth Room Study	34
3- Experiments on reactions between iron and phosphate in calcareous systems	36
A- preparation of samples	36
A-1 Reaction of Fe^{3+} with H_2PO_4^- under high pH	36
A-2 Reaction of Fe^{3+} with H_2PO_4^- in the presence of CaCO_3	37
B- Mineral analysis	38
X-ray Diffraction (XRD)	38
Transmission Electron Microscopy (TEM)	38
Scanning electron microscopy (SEM) and energy dispersive x-ray analysis (EDXRA)	39
DTPA-extractable Fe	39
III : RESULTS AND DISCUSSION	40
1- Greenhouse and laboratory experiments on iron nutrition and movement in soil	40
A- Greenhouse experiment	40
Plants	40
Yield	40
Iron	43
Manganese	46
Zinc	48
Soils	50
Iron	50
Manganese	55
Zinc	55
Phosphorus	55
B- Laboratory experiment	58
Iron	58

Manganese	61
Zinc	63
Soil pH	63
2- The role of soil CaCO₃ and soil iron in iron nutrition	66
1- Determination of the effective particle size distribution of soil carbonate by using steady-state procedure	68
Rate constants	68
Effective particle size distribution	68
2- The indigenous soil factors that influence iron availability	70
Soil iron oxide phase	77
Soil DTPA-extractable Fe	80
Soil CaCO ₃	82
Soil pH	83
3- Reactions between iron and phosphate in calcareous systems	84
Powder x-ray diffraction	84
Fe-containing compounds formed under high pH	84
Fe-containing compounds formed in under calcareous system	85
Transmission electron microscopy (TEM)	91
Scanning electron microscopy (SEM) and energy dispersive x-ray analysis	91
DTPA-extractable Fe as affected by P:Fe molar ratio	96
IV : CONCLUSIONS	103
SUMMARY	105
REFERENCES	109
APPENDIX	129
ARABIC SUMMARY
