

LIST OF FIGURES (Cont.)

<i>Fig. No.</i>	<i>Title</i>	<i>Page</i>
18	Serum globulins in PEM patients versus the control group	91
19	The mean RBCs and TLC in PEM patients versus the control group	93
20	Clinical signs detected in PEM patients pre and post - treatment .	93
21	Weight of PEM patients (on admission & 4 weeks after treatment) according to type and degree of PEM compared versus the control group .	98
22	Hemoglobin concentration (gm\dl) in PEM patients (on admission & 4 weeks after treatment) compared versus the control group .	98
23	Serum total proteins, albumin & γ globulins in PEM patients (on admission & weeks after treatment) compared to control group .	99
24	Serum alkaline phosphatase levels in PEM patients (On admission & 4 weeks after treatment) compared versus the control group .	99
25	Fasting serum triglycerides and blood glucose levels in PEM patients (on admission & 4 weeks after treatment) compared versus the control group .	101
26	Correlation between weight of PEM patients and hemoglobin concentration on admission.	101
27	Correlation between weight of PEM patients and serum total proteins on admission .	102
28	Correlation between weight of PEM patients and serum albumin on admission .	102
