

CONTENTS

	Page
Introduction	1
Aim of the Work	4
Review of Literature	
Chapter I : Historical Perspective	5
Chapter II: Pathophysiology of polycystic ovary syndrome	7
Chapter III: Neuromodulation in polycystic ovary syndrome	12
- The GnRH pulse Generator	12
- Insulin like-growth factor 1	14
- Endogenous Opioid	15
- Leptin	16
- Neuropeptide Y	19
- Galanin	20
Steroid sex hormones in PCOS:	20
- Androgens	20
- Progesterone	22
- Estrogen	24
Chapter IV: The Problem of Obesity and dyslipidemia in PCOS patients	27
Chapter V: Diagnostic criteria of polycystic ovary syndrome	29
- Clinical Presentation	29
- Family History	32
- Biochemical picture of PCOS	34
- Ultrasonic finding in polycystic ovary syndrome	40
- Differential Diagnosis of PCOS	45

Chapter VI: Lipid Profile	51
- Biochemical nature of lipids	51
- Physiological importance of lipids	51
- Lipoproteins	52
- Some Key Enzymes Involved in Lipid Transport	59
- Receptor involved in Lipoprotein Catabolism	61
- Laboratory Determination of cholesterol and triglyceride levels	62
Chapter VII : Dyslipidemia in polycystic ovary syndrome	64
I- Lipid Profile and insulin resistance in PCOS	64
II- Smaller LDL particle size in women with polycystic ovary syndrome compared to controls.	66
III- Relation of intra abdominal fat distribution to metabolic disorders in non obese patients with PCOS.	69
IV- Prevalence and predictors of dyslipidemia in women with polycystic ovary syndrome.	71
Chapter VIII : Obesity and polycystic ovary syndrome	75
Chapter IX : Lipids and Cardiovascular Profile	77
Chapter X : Metabolic Syndrome and PCOS	80
Subjects and Methods	83
Results	91
Discussion	103
Conclusions and Recommendations	109
References	110
Arabic Summary
